REQUEST FOR PROPOSAL "RFP" PS20161295
SUPPLY OF A FLEET MANAGEMENT INFORMATION SYSTEM

<u>QUESTIONS AND ANSWERS NO. 3</u>

ISSUED ON AUGUST 29, 2016

Q1	*Is any limitation to use existing ERP landscape if we propose SAP?*
A1	The city had completed a thorough fit gap and review against the requirements for a comprehensive fleet management solution. SAP was determined to be a poor fit and we decided against having the inventory in SAP due to the complex data integration required. We also reviewed other implementations with comparable cities (by size and operations) and determined that they were utilizing fleet specific software. However, if a previously unknown, demonstrable and proven implementation of SAP for Fleet was to be proposed, we would take it into consideration. We are looking for a proven, Fleet Information Management solution with some integration into SAP as detailed in the RFP.
Q2	*What version of SAP are you using?*
A2	For the purposes of integration the City's SAP environment is: – SAP ECC (version 6.7) – SAP Portal (version 7.5) – SAP SRM (version 7.3) – DB/OS (DB2 version 10.5) – AIX (version 6.1)
Q3	*Is this a new contract or is there a current incumbent?*
A3	Yes, it's a new contract, but we do have a FMIS (CCG) – see Annex 1, Section 1.6.
Q4	*Who is the current incumbent?*
A4	See answer above for details.
