

INVITATION TO TENDER (“ITT”) No. PS09150

SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL
PANEL

Tenders will be received in the Purchasing Services Office, 3rd Floor, Suite #320, East Tower, 555 West 12th Avenue, Vancouver, British Columbia, Canada, V5Z 3X7 prior to the Closing Time: 3:00:00 P.M. Vancouver Time (as defined in Note 2 below), Tuesday July 28, 2009 and registered at 11:00:00 A.M Wednesday July 29, 2009.

NOTES:

1. Tenders are to be in sealed envelopes or packages marked with the Tenderer’s Name, the ITT Title and Number.
2. Closing Time and Vancouver Time will be conclusively deemed to be the time shown on the clock used by the City’s Purchasing Services Office for this purpose.
3. The City’s Purchasing Services Office is open on Business Days 8:30 A.M. to 4:30 P.M. Vancouver Time and closed Saturdays, Sundays, and holidays.
4. DO NOT SUBMIT BY FAX.

All queries related to this ITT shall be submitted
in writing to the attention of:

Eamonn Savage,
Contracting Specialist,

Fax: 604.873.7057 E-mail: purchasing@vancouver.ca

PART A - INSTRUCTIONS TO TENDERERS**

NOTE: The definitions set out in Section 1.0 of Part B - General Conditions apply throughout this ITT, including this Part A of this ITT, except where otherwise expressly stipulated or the context otherwise requires.

1.0 Description of Requirement

- 1.1 The City of Vancouver (the "City") invites interested and qualified parties (the "Tenderers") to submit tenders ("Tenders") for the supply of a Motor Control Centre and Instrumentation and Control Panel as part of the Vancouver Landfill Pump Station Controls Upgrades Project. The successful Tenderer will be required to manufacture, deliver and commission a complete Motor Control Centre ("MCC"), an Instrumentation and Control Panel, and two (2) Variable Frequency Drive Units ("VFD"), all designed to be installed in the new Electrical and Controls pre-engineered building.
- 1.2 Tenderers are required to submit a Tender for the full Requirement only. Partial responses will be put aside and given no consideration.

2.0 Contract Term - Intentionally Omitted

3.0 Pricing

- 3.1 Pricing shall be held firm for the period of one year.
- 3.2 Prices quoted will be in Canadian currency and exclusive of all taxes, F.O.B. destination to the site(s) named herein, with all freight, unloading at destination, import duties, brokerage, royalties, handling, overhead, profit and all other costs included.
- 3.3 Any discounts offered shall be stated in Part D, Tender Form. Sections 2.1 and 2.2.

4.0 Conduct of the Contract - Inquiries and Clarifications

- 4.1 The City's Manager - Supply Management will have conduct of this Invitation to Tender (the "ITT"), and all communications are to be directed only to the contact person(s) named on the cover page.
- 4.2 It is the responsibility of the Tenderer to thoroughly examine these documents and satisfy itself as to the full requirements of this ITT. Inquiries are to be in written form only, faxed or e-mailed to the contact person shown on the cover page on or prior the deadline for inquiries and clarifications. If required, an addendum will be issued to all Tenderers.
- 4.3 The lowest or any Tender may not necessarily be accepted and the City of Vancouver will not be responsible for any cost incurred by the Tenderer in preparing the Tender.
- 4.4 Tenders are scheduled to close at the Closing Time listed on the cover page of this ITT.
- 4.5 Tenderers should note the following key dates:

**INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART A - INSTRUCTIONS TO TENDERERS**

Event	Dates
Deadline for submission of Tenders	3:00:00 P.M. Tuesday July 28, 2009

5.0 Inspection of Site - Intentionally Omitted

6.0 Submission of Tender

- 6.1 The response to this ITT with all accompanying schedules, appendices or addenda submitted by the Tenderer will be received up to the Closing Time on the date and in the place shown on the title page of this ITT (the "Closing Time"). The Tender shall be submitted on the forms provided in a sealed envelope or package, marked with the Tenderer's name and the ITT title and number.
- 6.2 Tenders received after the Closing Time or in locations other than the address indicated, will not be accepted and will be returned. The City may elect to extend the Closing Time.
- 6.3 The Tenderer shall submit four (4) copies of its Tender on the form provided (Part D - Tender Form and Appendix 1) in accordance with the instructions stated herein.
- 6.4 The City's language used in its procurement documents and the responses thereto, shall be English.
- 6.5 The Tenderer must enter its corporate or legal business name on the first page of the Tender Form. The Tender Form must be signed in the place provided by an officer or employee having authority to bind the Tenderer to the terms and conditions of this ITT. All other pages of the Tender Form should be initialled by the authorized signatory in the spaces provided.
- 6.6 Amendments to a Tender may be submitted if delivered in writing prior to the Closing Time in a sealed envelope or package, marked with the Tenderer's name and the ITT title and number.
- 6.7 Tenders may be withdrawn by written notice only, provided such notice is received at the Purchasing Services Office at the address shown on the cover page of this ITT prior to Closing Time.
- 6.8 All costs associated with the preparation and submission of the Tender, including any costs incurred by the Tenderer after the Closing Time, will be borne solely by the Tenderer.
- 6.9 By submitting a Tender, the Tenderer acknowledges and agrees that the liability of the City in connection with the ITT, the conduct or outcome of the ITT, all related processes, decisions and procedures, and any and all duties and obligations in connection with all of the foregoing, is limited in the aggregate to the maximum of \$1,000 (for any and all claims by the Tenderer combined with any and all claims of all other Tenderers and any and all other claimants in connection with the ITT), and that if payment is made by the City into Court (or into trust, for the benefit of all Tenderers and other such claimants, with a law firm reasonably selected for the purpose) of the said sum of \$1,000, then:

**INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART A - INSTRUCTIONS TO TENDERERS**

- a) that will be sufficient to fully release and discharge the City from all further liability; and
- b) the Tenderer will, upon the request from time to time of the City, execute and deliver a release (in such form as the requesting party may reasonably prescribe).

7.0 Bid and Performance Security

7.1 Each Tender should be accompanied by a Consent of Surety (Schedule "A" of the Form of Tender) or equivalent duly completed by a surety company authorized and licensed to carry on business in British Columbia and having an office in British Columbia.

7.2 Each Tender should be accompanied by a Bid Bond duly completed by a surety company authorized and licensed to carry on business in British Columbia and having an office in British Columbia, payable to the Owner, the City of Vancouver, in the amount of ten percent (10%) of the Total Tender Price, and not a dollar amount, as a guarantee of the due execution of an Agreement with the City and the delivery of the Bonds specified in Section 7.3 hereof.

7.3 The successful Tenderer shall, within five (5) Business Days from the date of acceptance, provide a Performance Bond in the amount of one hundred percent (100%) of the Tender price and/or other satisfactory security for performance. The surety, issued by a surety company licensed to transact business in British Columbia, must be in a form and contain terms satisfactory to the City's Director of Legal Services. The cost of the Performance Bond or other surety shall be borne by the Contractor.

7.4 The forms of the Bonds should be those issued by the Canadian Construction Documents Committee as follows:

Bid bond	CCDC 220 (latest)
Performance Bond:	CCDC 221 (latest)

7.5 The Bid Bond of unsuccessful Tenderers will be returned to them as soon as possible after the Contract is awarded and the Bid Bond of the Tenderer to whom the award is made will be returned to him/her upon delivery of a Performance Bond for one hundred percent (100%) of the Total Tender Price, and commencement of the Work.

8.0 Conflict of Interest

8.1 By submitting a Tender, the Tenderer warrants that neither it nor any of its officers or directors, or any employee with authority to bind the Tenderer, has any financial or personal relationship or affiliation with any elected official or employee of the City or their immediate families which might in any way be seen by the City to create a conflict of interest.

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART A - INSTRUCTIONS TO TENDERERS

9.0 Evaluation of Tenders and Award of Contract

- 9.1 Tenders will be evaluated on the basis of the overall best value to City based on quality, service, price and any other criteria set out herein including, but not limited to:
- a) the Tenderer's ability to meet the requirements, qualifications and competencies set out herein;
 - b) financial offer including but not limited to prices, operating and maintenance costs, warranty, and any life cycle considerations;
 - c) the Tenderer's business and technical reputation and capabilities; experience and where applicable, the experience of its personnel; financial stability; track record; and references of current and former customers;
 - d) ability of the Tenderer to meet the City's delivery schedule;
 - e) past performance with the City;
 - f) equipment quality, configuration, reliability, availability, age and condition; and
 - g) any other criteria set out in the ITT or otherwise reasonably considered relevant.
- 9.2 The City may elect to short list some of the Tenderers and require short listed Tenderers to provide additional information or details, including making a presentation, supplying samples, demonstrations, and/or additional technical literature. Samples of items, when required, must be submitted within the time specified and at no expense to the City. If not destroyed in testing, they will be returned at the Tenderer's request and expense.
- 9.3 Prior to Contract award, the Tenderer may be required to demonstrate financial stability. Should the City so request, the Tenderer will be required to provide annual financial reports or a set of financial statements prepared by an accountant covering the last two (2) fiscal years.
- 9.4 The City may, prior to Contract award, negotiate changes to the Scope of the Work, the materials, the Specifications or any conditions with any one or more of the Tenderers without having any duty or obligation to advise any other Tenderers or to allow them to vary their prices as a result of changes to the scope of Work, the materials, the Specifications, or any conditions, and the City shall have no liability to any other Tenderer as a result of such negotiations or modifications.
- 9.5 All Subcontractors of the Tenderer will be subject to the same evaluation process. It is the responsibility of the Tenderer to guarantee that all its Subcontractors will comply with all the Requirements and terms and conditions set out herein.
- 9.6 Preference may be given to Tenders offering environmentally beneficial products or services.
- 9.7 Award of a Contract is contingent on funds being approved and the contract award being made by City Council, if applicable.

**INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART A - INSTRUCTIONS TO TENDERERS**

- 9.8 The City will notify the successful Tenderer(s) in writing that it has been awarded the Contract.
- 9.9 The purchase order terms and conditions, excluding the provision titled “The City’s Offer”, will apply unless otherwise agreed in writing by the City.
- 9.10 The purchase order, the Tender, the ITT and such other documents including all amendments or addenda, shall form the basis for the Contract between the Contractor and the City. In the event of a conflict between any of the Contract Documents, the following documents will take precedence and govern over each other in the following order of priority from highest to lowest:
- a) subject to Section 9.9, the City’s purchase order including the standard purchase order terms and conditions (which may be downloaded from www.city.vancouver.bc.ca/bid/);
 - b) or any mutually agreed to amendments between the Tenderer and the City;
 - c) the Tender; and
 - d) the ITT and any subsequent addenda.
- 9.11 Where the head office of the successful Tenderer is located within the City of Vancouver and/or where the successful Tenderer is required to perform any Work at a site located within the City of Vancouver, the successful Tenderer is required to have a valid City of Vancouver business license prior to Contract execution.
- 9.12 The City is not under any obligation to award a Contract and may elect to terminate this ITT at anytime
- 10.0 Solicitation**
- 10.1 If any director, officer, employee, agent or other representative of a Tenderer makes any representation or solicitation to any officer, employee, agent or elected official of the City with respect to the Tender, whether before or after the submission of its Tender, the City shall be entitled to reject or not accept such Tender.
- 11.0 Acceptance and Rejection of Tenders**
- 11.1 Notwithstanding any other provision in the ITT documents, the City has in its sole discretion, the unfettered right to:
- a) accept any Tender;
 - b) reject any Tender;
 - c) reject all Tenders;
 - d) accept a Tender which is not the lowest Tender;
 - e) accept a Tender that deviates from the Requirements, Specifications or the conditions specified in this ITT;
 - f) reject a Tender even if it is the only Tender received by the City;
 - g) accept all or any part of a Tender; and
 - h) split the Requirements between one or more Tenderers.

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART A - INSTRUCTIONS TO TENDERERS

- 11.2 All Tenders shall be irrevocable and remain open for acceptance for at least sixty (60) days after the Closing Time, whether or not another Tender has been accepted.
- 11.3 Any deviations from the Requirements, Specifications or the conditions specified in this ITT, must be clearly stated in the Tender. The City will be the sole judge as to what constitutes an acceptable Tender deviation. If no deviations are indicated in the Tender, the City will be entitled to interpret that the Tenderer offers to perform in full compliance of the Requirements, Specifications and conditions stated herein.
- 11.4 The City may waive any non-compliance with the ITT, the Requirements, the Specifications, or any conditions, including the timing of delivery of anything required by this ITT and may elect to retain for consideration Tenders which are non-conforming, which do not contain the content or form required by the ITT or which have not complied with the process for submission set out herein.
- 12.0 Quantities
- 12.1 The quantities stated herein are the City's best estimates of its requirements and should not be relied on. Actual quantities may vary.
- 13.0 Brand Names
- 13.1 Unless otherwise stated, if and wherever the Specifications state a brand name, make, name of manufacturer, trade name, or vendor catalogue number, it is for the purpose of establishing a grade or quality of goods, material, equipment and/or services only. It is not intended to rule out competition from equal brands or makes. If, however, a product other than that specified is offered, it is the Tenderer's responsibility to name such a product in its Tender. Evidence of equality in the form of samples may be requested.
- 14.0 Alternates and/or Variations to Specifications
- 14.1 Except where stated otherwise herein, the Specifications describe what is considered necessary to meet the performance requirements of the City and Tenderers should bid in accordance with such Specifications, or if the Tenderer cannot meet the Specifications, the Tenderer may offer an alternative which it believes to be the equivalent.
- 14.2 Tenderers shall clearly indicate any variances from the City's Specifications or conditions no matter how slight. The attachment of descriptive literature from which variations may be gleaned will not be considered as a sufficient statement of variations.
- 14.3 If in addition to bidding on goods, materials, equipment and/or services that meet the Specifications, the Tenderer wishes to offer an alternative, the alternative Tender shall be submitted separately in the same format as the initial Tender.
- 14.4 The City is not obligated to accept any alternatives.
- 14.5 The City will determine what constitutes allowable variations.

**INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART A - INSTRUCTIONS TO TENDERERS**

15.0 Environmental Responsibility

- 15.1 The City is committed to preserving the environment. Tenderers shall provide environmentally sensitive products or services wherever possible. Where there is a requirement that the Contractor supplies materials, and where such materials may cause adverse effects, the Tenderer shall indicate the nature of the hazard in its Tender.
- 15.2 The Tenderer agrees to advise the City of any known alternatives or substitutes for such materials that would mitigate the effects of any adverse conditions on the environment.

16.0 Named Subcontractors

- 16.1 The Tenderer agrees that the Subcontractors shown in its Tender are the Subcontractors that it proposes to use to carry out the Requirements. The Tenderer agrees to engage the listed Subcontractors and no others in their stead without prior written authorization of the City.

17.0 Freedom of Information and Protection of Privacy Act

- 17.1 Tenderers should note that the City of Vancouver is subject to the Freedom of Information and Protection of Privacy Act (British Columbia), which imposes significant obligations on the City's contractors to protect all personal information acquired from the City in the course of providing any service to the City.

18.0 Confidentiality

- 18.1 Information about the City obtained by Tenderers must not be disclosed unless prior written authorization is obtained from the City.
- 18.2 The Contractor agrees that this obligation of confidentiality will survive the termination of the Contract between the Contractor and the City.

19.0 Design Drawings

- 19.1 One set of design drawings will be available for pick up free of charge during Business Days from 8:30 A.M. to 4:30 P.M. at:

City of Vancouver
Purchasing Services,
City Square
555 West 12th Avenue

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS

1.0 Definitions

The following words and terms, unless the context otherwise requires, shall have the meanings set out below. Words including the singular number include the plural and vice versa.

“Act of God” means a cataclysmic phenomenon of nature, including earthquake, flood or cyclone. Rain, snow, wind, high water or any other natural phenomenon, which might reasonably have been anticipated from historical records of the general locality of the City, shall be deemed not to be acts of God;

“Business Day” means a weekday (Monday to Friday) that is not a “holiday” as defined in the *Interpretation Act* (British Columbia);

“City” means the municipal corporation, generally known as the City of Vancouver, as described under the Vancouver Charter;

“City’s Designated Representatives” means the City’s employees or representatives who are authorized in writing to deal with the Contractor on behalf of the City in connection with the goods, materials, equipment and services or to make decisions in connection with the Contract;

“Closing Time” means the closing date, time, and place as set out on the title page of this ITT;

“Contract” means the agreement formed between the City and the Contractor as evidenced by the purchase order issued to the Contractor by the City;

“Contract Documents” means the purchase order, the Contractor’s Tender, the ITT and such other documents as listed in the Contract, including all amendments or addenda agreed between the parties;

“Contractor” means the successful Tenderer individual, partnership, corporation or combination thereof, including joint venturers who or which executes the resulting Contract;

“Delivery Date” means the date the City requires the Contractor to deliver the goods to the City’s Delivery Site;

“Delivery Site” means the Vancouver Landfill located at 5400-72nd Street in Delta, BC, Canada unless otherwise stated in this ITT;

“F.O.B.” means all costs of freight, insurance, brokerage, customs duties and all other costs of delivery to the site named as F.O.B. will be borne by the Contractor and that ownership and title to all goods, materials, and equipment are transferred to the City when same are delivered by the Contractor to the City and the risk of loss or damage to the goods, materials and equipment transfers to the City only at such time as same are received and accepted by the City at the site named as “F.O.B.” or Delivery Site;

“GST” means the goods and services tax administered under the Excise Tax Act (Canada) and any successor tax or levy therefore in force from time-to-time;

“ITT” means this Invitation to Tender including, but not limited to: Part A - Instructions to Tenderers; Part B - General Conditions; Part C - Requirements; Part D - Tender Form; Appendix 1 - Certificate of Existing Insurance; Appendix 2 - Certificate of Insurance; Appendices 3 to 6 - Detailed Equipment Specifications; Appendix 7 - Vancouver Landfill Site Safety Orientation,

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS

Appendix 8 Design Drawings, and any additional attachments listed in the Table of Contents; and any amendments, addenda, and/or clarifications pertaining to this ITT that may be issued prior to the Closing Date;

“OHS Regulation” means the *Workers Compensation Act* (British Columbia), including without limitation, the Occupational Health & Safety Regulation (BC Regulation 296/97, as amended by BC Regulation 185/99) enacted pursuant to such Act, all as such Act or Regulations are amended or re-enacted from time to time;

“PST” means British Columbia provincial sales tax and any successor tax or levies therefore in force from time-to-time;

“Requirements” means all of the Specifications, requirements and services set out in Part C and elsewhere in the ITT that describe the general requirements that the goods, materials, equipment and services must meet and the Contractor must provide;

“Specifications” means that part of the ITT consisting of general requirements and technical descriptions of the goods, materials, equipment, standards and workmanship;

“Subcontractor” means the person or persons with whom the Contractor has made an agreement to perform a portion or portions of the Work or to supply materials or equipment therefore;

“Tender” means the Tenderer’s offer made on the Tender form set out on Part D of this ITT with all appendices or addenda submitted by the Tenderer in response to the ITT;

“Tenderer” means the individual, partnership, corporation or combination thereof, including joint venturers, who or which sign the Tender form set out in Part D of this ITT;

“Unit” means a complete motor control center and control panel;

“Work” means all the labour, materials, equipment, supplies, services and other items necessary for the execution, completion and fulfilment of the Requirements;

“Work Site” means the site where the generator set will be installed.

2.0 Notices

2.1 Any notice required to be given in regards to the Contract(s) shall be given in writing and served personally or mailed by registered mail addressed to the City, to the Attention of the Manager - Supply Management and to the Contractor at the address set forth in its Tender.

3.0 Subcontractors

3.1 The City of Vancouver will not accept proposals from any contractor that will sub-contract for the work. Upon approval of any proposal and the signing of a contract, all sub-contracting, assigning or other sub-letting of the Services or Work is expressly prohibited and the successful Tenderer will not sub-contract any work without the prior written consent of the City, which consent may be arbitrarily withheld.

**INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS**

4.0 Independent Contractor

4.1 The Contractor, its Subcontractors, the officers, directors, shareholders, partners, personnel, affiliates and agents of the Contractor and its Subcontractors are not, nor are they to be deemed to be, partners, appointees, employees or agents of the City.

5.0 Assignment

5.1 Subject to Section 5.2 of Part B - General Conditions, the Contractor will not assign, sublet, subcontract, or let out as task work any part of the Work or any of the Contractor's obligations of the Contract Documents to any third party, and will not assign or otherwise transfer any of the rights of payment under the Contract Documents to any third party, without in each case the prior written consent of the City which consent the City may arbitrarily withhold.

5.2 Despite Section 5.1 of Part B - General Conditions, the Contractor may utilize those Subcontractors expressly named in Section 5.1 of Part D - Tender Form but only for the Area of Responsibility set out beside their name, provided always that the Contractor may not substitute or replace those Subcontractors, or permit those Subcontractors to further assign, sub-let, sub-contract, or let out as task work their obligations under the Contract Documents, except in accordance with Section 5.1 above.

5.3 If the City should consent to any such assignment, subletting or letting out as task work of all or any part of the Work, the Contractor shall in no way be relieved from its responsibility for the fulfilment of the Work, but shall continue to be responsible for the same in the same manner as if all the Work had been performed by the Contractor.

6.0 Time of the Essence

6.1 For all requests made by the City pursuant to the Contract, time is of the essence. The acceptance of a late performance, with or without objections or reservations by the City, shall not waive the right to claim damages for such breach nor constitute a waiver of the requirement of timely performance of any obligation remaining to be performed.

7.0 Laws, Permits and Regulations

7.1 The laws of British Columbia shall govern the Contract.

7.2 All provisions of the International Sale of Goods Act are specifically excluded from application of this Contract.

7.3 In carrying out its obligations hereunder, the Contractor shall familiarize itself and comply with all applicable laws, bylaws, regulations, ordinances, codes, specifications and requirements of all regulatory authorities, and shall obtain all necessary licenses, permits and registrations as may be required by law.

8.0 Workplace Hazardous Materials Information System ("WHMIS")

8.1 The Contractor shall provide appropriate labels and material safety data sheets for WHMIS regulated products. No product containing asbestos shall be supplied at any time without written authorization from the City.

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS

9.0 Product Standards

9.1 All electrical items shall comply with the relevant sections, latest editions, of versions of the Canadian Standards Association ("CSA") standard C22.1-09, Canadian Electrical Code (CEC), Electrical Safety Branch - BC Amendments to CEC Regulations and Bulletins, the City's Electrical Bylaw, and the National Building Code.

10.0 Changes in Requirements

10.1 The City, without invalidating the Contract, may make changes to the Contract by altering, adding to or deducting from the Requirements. Subject to mutual agreement, the Contractor shall proceed with the amended Requirements, and the amended Requirements shall be executed under the provisions of the Contract.

10.2 The Contractor shall not make any changes from the terms of the Contract unless it shall first have received the written consent of the City, and no claims for additional compensation shall be valid unless the change was so ordered.

11.0 Delivery

11.1 Deliveries must be made between 8:00 a.m. and 2:00 p.m. Monday to Friday, excluding statutory holidays, unless other arrangements have been agreed in writing. A material safety data sheet ("MSDS") must accompany all shipments containing products regulated under WHMIS legislation.

12.0 Quality of Workmanship and Materials

12.1 The Contractor shall perform the services with the degree of care, skill and diligence normally applied in the performance of services of a similar nature and in accordance with sound current professional practices and conforming to the requirements set out in the ITT.

12.2 Materials, goods and equipment shall be the products of suppliers or manufacturers of established reputation engaged in the supply or manufacture of such materials or equipment.

12.3 Materials are to be applied in accordance with the manufacturer's directions and shall use the techniques and applications best suited for the type of material being used.

13.0 Inspection

13.1 All goods, materials, equipment and/or services are subject to inspection and approval upon delivery. The City has the right to refuse acceptance of such goods, materials, equipment and/or services that are not in accordance with the Specifications, Requirements or the Contractor's warranty (expressed or implied).

13.2 Acceptance or rejection of the goods, materials, equipment and/or services shall be made as promptly as practical, but failure to inspect and accept or reject the goods, materials, equipment and/or services shall not relieve the Contractor from responsibility for such goods, materials, equipment and/or services that are not in accordance with the Contract.

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS

13.3 The City shall be the final judge of all goods, materials, equipment and/or services in respect of both quality and quantity and its decisions of all questions in dispute with regard thereto will be final. Materials, goods or equipment not accepted will be returned to the Contractor at the Contractor's expense.

13.4 The City will not be deemed to have accepted the goods, materials, equipment and/or services by virtue of a partial or full payment for them.

14.0 Warranty

14.1 The Contractor warrants that the goods, materials, equipment and/or services supplied by the Contractor to the City will be in full conformity with the Specifications as well as samples, if any, then this is a sale by sample as well as by description within the meaning of the Sale of Goods Act (BC).

14.2 The Contractor further warrants that the goods, materials and/or equipment are of merchantable quality, and fit for the intended use and will perform according to the requirements set out in the ITT.

14.3 Equipment and materials shall be new, free and clear of all liens, charges and encumbrances, the latest model, and shall be complete with all necessary accessories for operation. All equipment and materials shall be at the risk of the Contractor until delivered to and accepted by the City.

14.4 At a minimum, a one (1) year Parts and labour warranties, as detailed in the Detailed Equipment Specifications in Appendices 3, 4 5, and 6 shall be provided on all goods, materials, equipment and/or services provided under the Contract.

14.5 The Contractor warrants that its employees have the qualifications, experience, knowledge, skills and abilities necessary for the fulfilment of the Contract.

15.0 Protection of Person and Property

15.1 The Contractor shall use due care that no persons are injured, no property damaged or lost, and no rights are infringed in the performance of the Requirements, and the Contractor shall be solely responsible for all loss, damages, costs and expenses in respect of any injury to persons, damage of property, or infringement of the rights of others incurred in the performance of the Requirements or caused in any other manner whatsoever by the Contractor, or its employees.

15.2 The Contractor shall effectively warn and protect the public and other personnel from any danger as a result of the Requirements being done.

16.0 Rectification of Damage and Defects

16.1 The Contractor shall rectify any loss or damage for which, in the opinion of the City the Contractor is responsible, at no charge to the City and to the satisfaction of the City. Alternatively, the City may repair the loss or damage and the Contractor shall pay to the City the costs of repairing the loss or damage forthwith upon demand from the City. Where, in the opinion of the City, it is not practical or desirable to repair the loss or damage, the City may estimate the cost of the loss or damage and deduct such estimated amount from the amount owing to the Contractor hereunder.

**INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS**

17.0 Clean Up

17.1 The Contractor shall at all times conduct the Requirements in an orderly and reasonably tidy manner, and shall at suitable intervals remove any accumulation of rubbish or refuse materials. At no time shall any person employed by the Contractor or by any of its Subcontractors discard any litter or garbage on or adjacent to the Delivery Site, except into a suitable container.

18.0 Indemnification

18.1 The Contractor shall indemnify, hold and save harmless the City from and against all claims, losses, damages, costs, actions and other proceedings made, sustained, brought or prosecuted in a manner based upon, occasioned by or attributable to any injury, including death, property damage, infringement or damage arising from any act or omission of the Contractor, its employees, officers, volunteers, servants, Subcontractors, or agents or persons for whom the Contractor has assumed responsibility in the performance or purported performance of the Requirements.

18.2 The Contractor shall indemnify the City from and against any and all liability or expenses by way of legal costs or otherwise in respect of any claim which may be made for a lien or charge at law or in equity or to any claim or liability under the Builders Lien Act, or to any attachment for debt, garnishee process or otherwise.

18.3 The Contractor shall pay all royalties and license fees and shall save the City harmless from loss on account of suits or claims of infringement of patents in the performance of the Requirements.

18.4 The Contractor shall assume the defence of, and indemnify and hold harmless the City and its officers, employees and agents, from and against all claims relating to materials, goods or equipment furnished and to inventions, copyrights, trade marks, or patents and rights thereto used by the Contractor in the execution of the Contract and in subsequent use and/or operation by the City.

19.0 Termination

19.1 The City will advise the Contractor by written notice of its intent to terminate the whole or any part of the Contract in any one of the following circumstances:

- a) if the Contractor fails to make delivery of the goods, materials, equipment and/or services within the time specified, or fails to perform any other provisions, terms or conditions of the Contract within the time specified, or within a reasonable time if no time is specified;
- b) in the event that the Contractor performs any act or does anything by which the City shall incur any liability whatsoever;
- c) any failure of the Contractor to meet the safety requirements of the Contract;
- d) in the event that any creditor of the Contractor causes a writ of execution or similar writ or court order to be served upon the City requiring the City to pay any portion due to the Contractor under the Contract; or

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS

- e) in the event that the Contractor is adjudged bankrupt or if it makes a general assignment for the benefit of creditors or if it becomes insolvent or if it should take the benefit of any Act that may be in force for bankrupt or insolvent debtors.
- 19.2 Upon termination of the Contract, the City shall have no obligation to the Contractor except for such goods, materials, equipment and/or services as have been supplied up to the date of the termination of the Contract(s).
- 19.3 Upon termination of the Contract(s) in whole or in part, the City may procure similar goods, materials, equipment and/or services and the Contractor shall be liable to the City for any excess costs for such similar goods, materials, equipment and/or services. The Contractor shall not be liable for any excess costs if failure to perform arises by reason of strikes, lockouts, Acts of God or acts of the City. The City will not be liable where Delivery Sites are not available due to strikes, lockouts or Acts of God.
- 20.0 **Insurance Requirements**
 - 20.1 The Tenderer is advised to refer to the Certificate of Insurance [Appendix 2]. This is the type of certificate that the City would require should the Tenderer be selected as the successful Contractor.
 - 20.2 Tenderers are to submit with their Tenders a Certificate of Existing Insurance in the form set out in the attached Certificate of Existing Insurance [Appendix 1] as evidence of their existing insurance coverage. Appendix 1 may be amended where appropriate to add the types of insurance currently carried by the Tenderer which are not explicitly referenced on the Certificate.
 - 20.3 Without limiting any of its obligations or liabilities under the Contract, the Contractor and its Subcontractors shall obtain and continuously carry during the term of the Contract at their own expense and cost, the following insurance coverages with minimum limits of not less than those shown in the respective items set out below.
 - 20.4 All insurance policies shall be in a form and in amounts satisfactory from time-to-time and with insurers acceptable to the City's Director of Risk Management and shall provide the City with thirty (30) days prior written notice of material change, lapse or cancellation. Notice must identify the Contract title, number, policyholder, and scope of work.
 - 20.5 The Contractor and each of its Subcontractors shall provide at their own cost any additional insurance which they are required by law to provide or which they consider necessary.
 - 20.6 Neither the providing of insurance by the Contractor in accordance with the requirements hereof, nor the insolvency, bankruptcy or the failure of any insurance company to pay any claim accruing shall be held to relieve the Contractor from any other provisions of the Contract Documents with respect to liability of the Contractor or otherwise.
 - 20.7 The insurance coverage shall be primary insurance as respects the City. Any insurance or self-insurance maintained by or on behalf of the City, its officers, officials, employees, servants or agents shall be excess of this insurance and shall not contribute with it.

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS

- 20.8 Prior to commencement of this Contract, the Contractor shall provide the City with evidence of all required insurance in the form of the attached Certificate of Insurance. The Certificate of Insurance shall identify the Contract title, number, policyholder and scope of work and shall not contain any disclaimer whatsoever. At all times thereafter, during the term of this Contract, the Contractor shall covenant and agree to comply with all its insurance obligations described herein. Certified copies of all insurance policies shall be made available to the City's Director of Risk Management at any time during the term of the Contract upon request.
- 20.9 The Contractor shall provide in its agreements with its Subcontractors clauses in the same form as those found herein. Upon request, the Contractor shall deposit with the City's Director of Risk Management detailed certificates of insurance for the policies it has obtained from its Subcontractors and a copy of the insurance clauses so provided in the said agreements.
- 20.10 The Contractor shall obtain and maintain in full force and effect during the term of the Contract, insurance not less than that set out below and provide proof of such insurance provided by a company duly registered and authorized to conduct insurance business in the Province of British Columbia.
- a) Commercial General Liability insurance in sufficient amounts and description to protect the Contractor, its Subcontractors, the City and its respective officers, officials, employees, servants and agents against claims for damages, personal injury including death, bodily injury and property damage which may arise under this Contract.
- The limit of commercial general liability insurance shall be not less than five million dollars (\$5,000,000) per occurrence inclusive for personal injury, death, bodily injury or property damage and in the aggregate with respect to products and complete operations. The deductible per occurrence shall not exceed two thousand five hundred dollars (\$2,500) per occurrence.
The policy of insurance shall:
- i) be on an occurrence form;
 - ii) add the City and its officials, officers, employees and agents as additional insureds;
 - iii) contain a cross-liability or severability of interest clause;
 - iv) extend to cover non-owned automobile, contingent employer's liability, blanket contractual liability, contractor's protective liability, broad form property damage, broad form completed operations and operations of attached machinery.
- b) The Contractor shall ensure that vehicles owned and/or operated by the Contractor in connection with the Contract maintain Third Party Legal Liability Insurance in an amount not less than five million dollars (\$5,000,000) per occurrence.
- 20.11 Insurance covering all risks of physical loss or damage to the equipment and all components thereof in an amount of not less than the full Contract price and which shall include a waiver of subrogation against all unissued parts and a deductible of no

INVITATION TO TENDER NO. PS09150

PART B - GENERAL CONDITIONS

more than five thousand dollars (\$5,000) for each and every claim and which insurance shall terminate on safe delivery to and acceptance by the City of the equipment at the site.

21.0 WorkSafeBC Compliance

21.1 Prior to commencing any services on the City's site, the Contractor must provide evidence that it is in good standing with WorkSafeBC. The Contractor is responsible for having the site secured in accordance with WorkSafeBC safety regulations and ensure that no danger shall befall the public at any time during the performance of the Services.

- a) *Payment of WorkSafeBC Assessments* - The Contractor agrees that it shall at its own expense procure and carry or cause to be procured and carried and paid for, full WorkSafeBC coverage for itself and all workers, employees, servants and others engaged in or upon any work or service which is the subject of this Contract. The Contractor agrees that the City has the unfettered right to set off the amount of the unpaid premiums and assessments for such WorkSafeBC coverage against any monies owing by the City to the Contractor. The City shall have the right to withhold payment under this Contract until the WorkSafeBC premiums, assessments or penalties in respect of work done or service performed in fulfilling this Contract had been paid in full.
- b) *General WorkSafeBC Obligations* -The Contractor will have a safety program acceptable to WorkSafeBC and will ensure that all City and WorkSafeBC safety policies, rules and regulations are observed during performance of this Contract, not only by the Contractor but by all Subcontractors, workers, material suppliers and others engaged in the performance of this Contract.
- c) *Initial Proof of WorkSafeBC Registration/Good Standing* - Within five (5) Business Days of the City requesting the Contractor to do so, the Contractor will provide the City with the Contractor's and all Subcontractors' WorkSafeBC registration numbers.
- d) *Subsequent Proof of WorkSafeBC Registration/Good Standing* - Within five (5) Business Days of the City requesting the Contractor to do so, and concurrently with making any application for payment under this Contract, the Contractor will provide the City with written confirmation that the Contractor and all Subcontractors are registered in good standing with WorkSafeBC and that all assessments have been paid to the date of the City's request or to the date of the application for payment, as applicable.
- e) *Special Indemnity Against WorkSafeBC Non-Compliance* - The Contractor will indemnify the City and hold harmless the City from all manner of claims, demands, costs, losses, penalties and proceedings arising out of or in any way related to:
 - i) Unpaid WorkSafeBC assessments of the Contractor or any other employer for whom the Contractor is responsible under this Contract,
 - ii) The acts or omissions of any person engaged directly or indirectly by the Contractor in the performance of this Contract, and which acts or omissions are or are alleged by WorkSafeBC to constitute a breach of the WorkSafeBC OHS Regulation or other failure to observe safety

**INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS**

rules, regulations and practices of WorkSafeBC, including any and all fines and penalties levied by the WorkSafeBC, or

- iii) Any breach of the Contractor's obligations under this General Condition.

22.0 Character of Workers

22.1 On the written request of the City, the Contractor will remove any employee, sub-contractor or agent for any reason including but not limited to the following:

- a) lack of or failure to obtain any required Security Clearance;
- b) intoxication;
- c) use of foul, profane, vulgar or obscene language or gestures;
- d) solicitation of gratuities or tips from any person for services performed under the Contract;
- e) wilful, negligent or reckless action in disregard of safety or sanitary requirements or regulations; or
- f) any action which may constitute a public nuisance or disorderly conduct.

22.2 The Contractor will immediately comply with each such request and will then provide the City with all requested documentation verifying that the employee, Subcontractor or agent has been removed from further involvement with this Contract.

23.0 Failure to Perform

23.1 Should the Contractor neglect to execute the Requirements properly or fail to perform any provision of the Contract, the City may, without prejudice to any other right or remedy it may have, make good such deficiencies and may deduct the cost thereof from the payment due to the Contractor.

23.2 If the Contractor fails to perform any provision of the Contract due to reasons of strike, lockout or other work stoppages, the City may upon ten (10) days written notice to the Contractor terminate the Contract without prejudice to any other right or remedy the City may have.

24.0 Dispute Resolution

24.1 All claims, disputes or issues in dispute between the City and the Contractor shall be decided by mediation or arbitration, if the parties agree, or failing agreement, in a Court of competent jurisdiction within the Province of British Columbia and be governed by the laws of British Columbia.

24.2 In the event that the parties agree to arbitration pursuant to the above, the arbitration shall be governed by the rules of the British Columbia International Commercial Arbitration Centre, except that the arbitrator or arbitrators shall be agreed upon by the parties, and failing agreement by the parties, shall be appointed by a court of competent jurisdiction within the Province of British Columbia.

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS

- 24.3 In the event that the parties agree to arbitration, the arbitration shall take place in the Lower Mainland, British Columbia and be governed by the laws of British Columbia.
- 24.4 The procedure set out in this section is not meant to preclude or discourage informal resolution of disagreements between the City and the Contractor.
- 25.0 Payments**
- 25.1 The Contractor shall be paid net thirty (30) days from receipt of invoice and acceptance of the goods, materials, equipment and or services, whichever is the latter.
- 26.0 Taxes**
- 26.1 Unless otherwise provided herein, the Contractor shall pay all sales or excise taxes in force during the term of the Contract, provided that any increase or decrease in such taxes shall increase or decrease the amount due under the Contract.
- 26.2 Invoices shall show the appropriate amounts for GST and PST.
- 27.0 Non-resident Withholding Tax - Intentionally Omitted**
- 28.0 No Promotion of Relationship**
- 28.1 The Contractor must not disclose or promote its relationship with the City, including by means of any verbal declarations or announcements and by means of any sales, marketing or other literature, letters, client lists, press releases, brochures or other written materials without the express prior written consent of the City (except as may be necessary for the Contractor to perform the Contractor's obligations under the terms of the Contract). The Contractor undertakes not to use "VANOC", "Vancouver 2010", the official emblem, logo or mascot of the 2010 Games or any reference or means of promotion or publicity, without the express prior written consent of the City. Furthermore, the Contractor undertakes not to disclose or promote its relationship with the City in any communication or manner whatsoever as a basis to create an association, express or implied, between the Contractor and the IOC, the Olympics or the Olympic Movement.
- 29.0 Commencement of Warranty Period**
- 29.1 The warranty period shall commence at the time the City puts the equipment (the "Unit") into service, or three (3) months after acceptance of the Unit, whichever is sooner.
- 29.2 The City will notify the Contractor the date that the Unit goes into service.
- 29.3 The warranty should be made out to the City of Vancouver, 453 West 12th Avenue, Vancouver, BC, V5Y 1V4.
- 30.0 Required Documentation**
- 30.1 The following documentation shall accompany each Unit at time of delivery. Failure to include all or some of the listed documents will delay the City's acceptance of the Unit:

**INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS**

- a) Copy of the commercial invoice;
 - b) Owner service policy and warranty; and
 - c) Shop drawings as specified in Appendices 3 to 6;
- 30.2 The City of Vancouver address shown on the documentation should read the same as the Delivery Site address set out on the purchase order.
- 31.0 Plant Production Limitations
- 31.1 If any Unit ordered under the Contract cannot be manufactured because of plant production limitations, the City reserves the right to purchase the current replacement model at a revised price.
- 31.2 The revised price shall be based on a percentage adjustment based on (i) the published manufacturer's retail/list prices at the time of the Tender and (ii) the first published manufacturer's retail/list prices for the next model year.
- 31.3 The Contractor shall notify the Manager - Supply Management in writing if such a production situation occurs, and shall submit with the letter of notification, comparative manufacturer's retail lists supporting the proposed revision(s).
- 32.0 Delays or Failure to Conform To Specifications
- 32.1 Liquidated Damages for Late Delivery or failure to conform to Detailed Equipment Specifications:
- a) If the Contractor fails to deliver the Unit to the Work Site by the Delivery Date as set out in Part C Requirements, Section 3.1 as may be adjusted pursuant to the provisions of the Contract Documents, or if the Unit should fail to function or fail to conform to the Detailed Equipment Specifications or to Part C - Requirements resulting in any delays whatsoever to the project schedule including start up, commissioning, testing, and training then the City may deduct from any monies owing to the Contractor for the Work:
 - i) as a genuine pre-estimate of the City's increased costs for delay of sequential construction tasks, an amount of \$1000.00 per day or pro rata portion for each calendar day that delivery of the Unit is achieved after the Delivery date or that the Unit fails to function or perform as called for in the Detailed Equipment Specifications; plus
 - (ii) all direct out-of-pocket costs such as costs for safety, security, or equipment rental, reasonably incurred by the City as a direct result of such delay or failure to perform or to function as called for in the Detailed Equipment Specifications.
- 32.2 If monies owing to the Contractor are less than the total amount of liquidated damages owed by the Contractor to the City under (a) above then any shortfall shall immediately, upon written notice from the City, be due and owing by the Contractor to the City.

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART B - GENERAL CONDITIONS

33.0 Safety

33.1 In addition to Part B - General Conditions - Section 21 - WorkSafeBC Compliance the Contractor will be responsible for the health and safety of all the Contractor's and Subcontractors' staff that report to it, either directly or indirectly. The Contractor will comply with the City's health and safety program and Transfer & Landfill Operations Site Safety requirements as outlined in Appendix 7.

34.0 Alternate Products

34.1 Where specific products or suppliers are identified in the Tender documents, bids are to be based on the identified products and suppliers. Substitution of alternate products may be considered after the close of Tenders where it can be shown that the alternate product meets the requirements of the project and offers significant cost savings or technological advantage to the City of Vancouver.

**INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART C - REQUIREMENTS**

1.0 Scope of Contract

The Vancouver Landfill (the "Landfill"), located in Delta at 5400 72nd Street, is owned and operated by the City of Vancouver. The Landfill serves over 1,000,000 residents of Vancouver, Delta, Richmond, White Rock, University Endowment Lands and parts of Surrey. The Landfill is authorized to receive 750,000 tonnes of municipal solid waste annually. The future development strategy for the Landfill is to fill higher within the existing footprint for approximately 40 more years.

Leachate is the product of water percolating through refuse and is collected in a double ditch system around the perimeter of the Landfill. The inner ditch collects leachate, while the outer ditch collects clean water that runs off adjacent land. Water in the outer ditch is maintained at a higher elevation, creating a net water inflow towards the inner ditch, so leachate is contained within the inner ditch. Ditches flow by gravity to the pump station at the southwest corner of the site. Leachate is transported from the pump station through a force main to Annacis Island Wastewater Treatment Plant.

The scope of work for the Pump Station Controls Upgrade Project includes the supply and installation of specialized equipment and construction work to upgrade to the control system and standby power for the leachate pump station. The purpose of the upgrade is to minimize the potential for failure of the systems during emergency operations. Stantec Consulting Ltd the (the "Consultant") was retained in March 2008 to provide Professional Services including detailed design and construction supervision for this project.

The Project work will be broken up into 3 separate tender packages to minimize delivery time for the specialized equipment and ensure the project schedule is met:

- .1) ITT PS09150 Supply and Delivery of Motor Control Center (MCC) and Control Panel (this tender) is to include the supply, delivery and placement of an MCC, Instrumentation and Control Panel, and two Variable Frequency Drives (VFDs) in the pre-engineered building provided by the General Contractor. The supply contractor shall test, start-up, commission and provide training on the supplied equipment, as coordinated with the general contractor.
- .2) ITT PS09149 Supply and Delivery of Diesel Generator & Automatic Transfer Switch is to include the manufacture, delivery and on-site placement of a diesel generator in a weatherproof enclosure, as well as generator controls and all accessories, a fuel tank, and an automatic transfer switch. The supply contractor shall test, start-up, commission and provide training on the supplied equipment, as coordinated with the general contractor.
- .3) ITT PS09079 Vancouver Landfill Pump Station Controls Upgrade, to include the overall coordination of the project as Prime Contractor, site preparation, provision of electrical and communication connections, installation of piping/valves/instruments, installation of the equipment provided by other two (2) supply and delivery tender packages, and supply of a pre-engineered building to house all control equipment.

Construction must be completed by December 1, 2009 at the latest, based on the need for dry weather to complete equipment installation, start-up and commissioning.

An overview of the scope of the Supply and Delivery of the MCC and Control Panel package as required by this ITT is provided separately below.

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART C - REQUIREMENTS

2.0 Requirements

- 2.1 The Supply and Delivery of the MCC and Control Panel is to include, but is not limited to:
- a) Supplying the specified motor control centre, variable frequency drive units, and instrumentation and control panel;
 - b) Delivering the equipment to the site and putting it in place in the pre-engineered building and/or designated enclosure;
 - c) Incorporating the automatic transfer switch provided by the generator supplier into the MCC;
 - d) Assisting and supporting the general contractor with any information required to complete the connection of the supplied equipment to any field devices and other equipment and systems not provided under this contract; and
 - e) Conducting testing, startup, commissioning, and training for the supplied equipment.
- 2.2 Detailed specifications are set out in Appendices 3 to 6, and design drawings are bound separately. Tenders shall clearly indicate any deviations from the equipment specifications set out therein.

3.0 Delivery

- 3.1 The City requires that the delivery of the MCC and Control Panel and all accompanying components be co-ordinated with the general contractor for the Pump Station Controls Upgrade Project. It is anticipated that delivery of the MCC and Control Panel will be required on or before October 15, 2009.
- 3.2 The City of Vancouver may designate alternate delivery to the Work Site in phased stages.
- 3.3 There will be a need for the Contractor to coordinate with others for delivery access to the Work Site and for commissioning and training activities. The Tenderer is required to work together with the City and other contractors to resolve any coordination issues that may arise as a result of these activities.
- 3.4 The Contractor shall be required to obtain an appointment to deliver the Products to the Work Site and delivery should be between the hours of 8:00 A.M. and 2:00 P.M. Monday to Friday.
- 3.5 Address of the Vancouver Landfill:

Vancouver Landfill
5400-72nd Street
Delta, BC

Attention: General Contractor - to be determined through a separate bid process.

The Contractor shall deliver the Products to the Work Site and put them in place on the designated concrete pad prepared by the successful Tenderer for the General Contract ITT.

was hereto affixed in the

presence of:

INVITATION TO TENDER NO. PS09150
SUPPLY AND DELIVERY OF MOTOR CONTROL CENTRE AND CONTROL PANEL
PART D - TENDER FORM

SCHEDULE "B"

TENDERER'S PROPOSED VARIATIONS

The Tenderer should make a full and complete statement and description of any changes or variations it proposes in the Specifications for the Work as set out in the Tender Documents, if any.

Additional pages may be attached to this page and/or separate numbered documents such as specifications, descriptive literature and drawings may be submitted with this Schedule "B". Each such additional page and/or separate document will be clearly marked "Invitation to Tender No. PS09150, Supply and Delivery of Motor Control Center and Control Panel, Part D - Form of Tender - Schedule "B" - Tenderer's Proposed Variations", with the name of the Tenderer indicated and each additional page initialed on behalf of the Tenderer.

**CERTIFICATE OF EXISTING INSURANCE
TO BE COMPLETED AND SUBMITTED ALONG WITH TENDER**

Section 2 through 8 - to be completed by the Insurer or its Authorized Representative

1. THIS CERTIFICATE IS ISSUED TO: City of Vancouver, 453 W 12th Avenue, Vancouver, BC, V5Y 1V4
And certifies that the insurance policy (policies) as listed herein has been issued to the Named Insured and is in full force and effect as of the effective date of the agreement described below.

NAMED INSURED *(must be the same name as the proponent/bidder and is either an individual or a legally incorporated company)*

BUSINESS TRADE NAME or DBA DOING BUSINESS AS

BUSINESS ADDRESS

DESCRIPTION OF OPERATION

3. PROPERTY INSURANCE (All Risks Coverage including Earthquake and Flood)

INSURER _____	Insured Values (Replacement Cost) -
TYPE OF COVERAGE _____	Building and Tenants Improvement \$ _____
POLICY NUMBER _____	Contents and Equipment \$ _____
POLICY PERIOD From _____ to _____	Deductible Per Loss \$ _____

4. COMMERCIAL GENERAL LIABILITY INSURANCE (Occurrence Form)

Including the following extensions:

PART 1 GENERAL (SECTION 16010)

1.1 General

Definitions in this section and in other parts of this appendix and the other appendices shall be taken as included in and supplementary to the definitions given in Part B of the General Conditions. If any conflict is found between these definitions, and the definitions of Part B of the General Conditions, the definitions of Part B of the General Conditions shall prevail.

- .1 This section covers General requirements of the supply of a complete Motor Control Center (MCC), two Variable Frequency Drive Units (VFD) and an Instrumentation Control Panel for the City of Vancouver Leachate Pumping Station, installed at the site, including all internal connection of the equipment. External connections from equipment not supplied under this contract will be made by others.
- .2 Owner shall mean the City of Vancouver or it's appointed representative.
- .3 Engineer shall mean Stantec Consulting or their appointed representative.
- .4 The word "supply" as used in these specifications shall be taken to mean that so noted equipment is to be purchased, assembled and shipped to the site. The supplier of the equipment is responsible to confirm functionality of the equipment at site prior to the commissioning of the completely assembled equipment. Where an item is noted as supplied by the City, by others, or by another division, the work of mounting, connecting and commissioning the item shall be done by others unless specifically otherwise noted.
- .5 The word "provide" as used in these specifications shall be taken to mean that the so noted equipment is to be supplied, mounted, connected, adjusted, commissioned and placed into service.
- .6 The word "approved" as used in these specifications shall be taken to mean that so the noted equipment is to be approved by the Engineer prior to fabrication.
- .7 The word "install" means all work and material necessary to place the specified item into full operation, securely fastened and to give a presentable finished appearance. "Install" also includes all necessary connections, conductors, ducts, wireways and conduits.
- .8 The word "coordinate" as used in these specifications shall be taken to mean to make all arrangements directly with agencies and individuals, confirm schedules, be in attendance at the time work is carried out, take full responsibility for having the work carried out correctly and in timely manner to meet the construction schedule.
- .9 The term "field wiring" as used in these specifications shall be taken to mean all work necessary to connect from the supplied equipment to other systems and equipment not supplied under this contract.
- .10 The Contractor shall be ultimately responsible and shall provide for the supply, certification, adjustment and start-up, of a complete, coordinated system that shall reliably perform the intended functions.
- .11 Except where otherwise noted the Contractor shall make all system power and electrical signal connections to all component equipment and systems supplied under this contract:

- a) For each digital input check complete circuit by actually operating the source device or instrument and confirming that the signal is received at the appropriate PLC input.
- b) For each analog input check operation of the complete circuit by actually operating the source device or instrument, or where this can not be done due to process conditions by connecting a loop calibrator at the field end (instrument position) and confirm that the signal is received at the appropriate PLC input. Where possible, vary the signal through its full range.
- c) For each digital output, using a PC with appropriate software, connect to the associated PLC and force the output into the off and on states and confirm correct operation of the associated field device.
- d) For each analog output, using a PC with appropriate software, connect to the associated PLC and force the analog output through its full range and confirm correct operation of the associated field device.
- e) Provide a checklist with each loop or circuit checked off by the Contractor prior to start of commissioning.
- f) Before performing tests, confirm that no risk to personnel or equipment exists. If the test can not be carried out, advise the engineer.

.12 The Contractor shall ensure that:

- a) All control panels, devices, motors, instruments, wiring, and other components to be provided by the Contractor under this section are properly and perform properly as an integrated unit.

1.2 Codes and Standards

.1 As referenced in other sections.

1.3 Compliance

- .1 Failure to comply with the specifications shall be cause for rejection and the contractor shall be required to make good at no additional cost to the City or their agents.
- .2 Where a conflict exists between any applicable code, regulation, directive, standard or manufacturers recommended practice for any item and what is shown on drawings or specified, seek clarification from the Engineer prior to submitting tender or allow for the most expensive alternative.

1.4 Work Included

- .1 Work shall be in accordance with the specifications and shall include all materials, labor, tools, and equipment required for a complete and operational installation. Any equipment, connections, conductors, or installation, material not specifically mentioned, but clearly required to furnish complete and operational systems shall be provided as if specifically detailed. Where there is conflict between specifications or details in the specifications or if additional information is required, obtain clarification from engineer before submitting tender. If clarification is not requested allow for the most expensive alternatives.
- .2 The contract price shall include but not be limited to the following:

Supply, delivery, testing, startup and commissioning of a complete Motor Control Center (MCC), Variable Frequency Drives (VFD), and complete Instrumentation and Control Panel. Refer to drawings and other specification sections for additional details. The intent of these specifications is that the supply contractor shall fabricate the specified equipment complete as indicated on the drawings, shall test it completely to assure complete and correct operation, and shall deliver it to site and put it in place. Connection to field devices and other equipment and systems not provided under this contract will be by others. Assist and support the general contractor with any information required to complete those connections, and then start up and commission the Motor Control Centre, Variable Frequency Drives and the Instrumentation and Control Panel. Coordinate this work with the work of the general contractor.

1.5 Submittals

- .1 Provide submittals to fully describe and detail the equipment being supplied.
- .2 Specifically, the Contractor shall submit at time of tender the following material:
 - a) Catalogue information, descriptive literature, wiring diagrams, and engineered design drawings of the MCC, VFD's, Instrumentation and Control Panel and individual components used in the fabrication.
 - b) Individual data (or specification) sheets shall be provided for all components provided under this section. The purpose of these data sheets is to supplement the generalized catalogue information provided by citing all specific features for each specific component (e.g. scale range, materials of construction, special options included, etc). Each component data sheet shall bear the component name and instrument tag number designation shown in Specifications.
 - c) Catalogue information on all electrical devices furnished under this section.
 - d) Shop drawings including complete instrumentation manuals technical specifications and catalogue material for the equipment. Complete assembly and layout drawings to scale.
 - e) Interconnecting point-to-point wiring diagrams, showing all component and panel terminal board identification numbers and external wiring numbers. These diagrams shall include all intermediate terminations between field elements and panels, and 120 VAC power supply circuits.
- .3 The Contractor shall provide a Component Part List. The Component Part List shall be a complete parts list for the entire Process Instrumentation and Control system, and shall have the following features:
 - a) All components shall be grouped by component type, with the component types identified in a similar manner to the component identification code used in these Specifications.
 - b) All components shall be listed with their exact and complete manufacturer's part number, including all options or accessories.
 - c) All components shall be identified with their complete tag number as shown in these Specifications, or as modified or assigned by the Contractor and approved by the Engineer.

- d) All components without tag numbers shall be grouped within component types by manufacturer's part number. Exact quantities shall be listed for each part number.

1.6 Operation and Maintenance (O&M) Manuals

- .1 Provide installation, operation and maintenance manuals on all equipment designated for shop drawings.
- .2 Provide four sets of original documents, bound in a hard cover three ring binder each with a table contents, dividers and tabs.
- .3 Originals and good quality photocopies equal to the original are acceptable.
- .4 The Operation and Maintenance Manuals shall include, but not be limited to, the following: installation instructions; maintenance and overhaul instructions; procedures for start, operation and shut-down of all equipment and systems, complete wiring and control diagrams; other equipment; safety precautions; diagrams and illustrations; manufacturer's name and catalog data; test procedures; name and address of authorized service organization and parts distributor for all material and equipment installed and contractor's name, address and phone number.
- .5 Hand written notes are not acceptable.
- .6 Provide instruments and equipment manufacturer's installation and user manuals. Data sheets and brochures are not acceptable.
- .7 At the beginning of each section of O&M manual provide a table to indicate instruments and equipment tag numbers, part numbers and calibration information.
- .8 Record all commissioning settings in the manual.
- .9 Provide a Table of Contents for each O&M manual binder. Each tab shall be described in detail in the Table of Contents.
- .10 If repair or replacement parts lists are available, these are to be included as part of this manual.

1.7 Permits, Costs and Inspection

- .1 Obtain all necessary permits and pay associated costs.

1.8 Guarantee / Warranty

- .1 The contractor shall guarantee/warrant all equipment of his supply and replace at his expense any part which may fail or prove defective within a period of twelve months after final acceptance.

1.9 Voltage Ratings

- .1 Operating voltages: to CAN3-C235-83, plus all equipment must operate reliably on power supplied by B.C. Hydro, which is within B.C. Hydro's acceptable operating guidelines.

1.10 Materials and Equipment

- .1 Equipment and materials to be CSA certified or have equivalent electrical certification as accepted in British Columbia.
- .2 Where there is no alternative to supplying equipment that is not certified, as specified, obtain special approval from Electrical Inspection Department.

DETAILED EQUIPMENT SPECIFICATIONS
GENERAL ELECTRICAL REQUIREMENTS

- .3 Equipment supplied shall be of the manufacturer's latest design and shall produce or be activated by signals that are established standards for water and wastewater industry.

1.11 Painting and Finishes

- .1 Electrical equipment shall be finish painted, scratch-proof, heat and fuel and oil resistant.
- .2 Exterior Paint colour shall be manufacturer's standard colors. ANSI 61 gray. Metal interior surfaces shall be gloss white.
- .3 Where touch-up or repainting is required, use paint obtained from the equipment manufacturer, exactly matching the original finish.

1.12 Equipment Identification

- .1 Identify electrical equipment, including but not limited to the MCC, VFDs and ICP with name plates and labels as follows:
 - a) Nameplates:
 - i) Lamacoid 3 mm thick plastic engraving sheet, black face, white core, mechanically attached with self tapping screws unless noted otherwise.

Nameplate Sizes

Size 1	10 x 50 mm	1 line	3 mm high letters
Size 2	12 x 70 mm	1 line	5 mm high letters
Size 3	12 x 70 mm	2 lines	3 mm high letters
Size 4	20 x 90 mm	1 line	8 mm high letters
Size 5	20 x 90 mm	2 lines	5 mm high letters
Size 6	25 x 100 mm	1 line	12 mm high letters
Size 7	25 x 100 mm	2 line	6 mm high letters

- ii) Wording on nameplates, nameplate size, and lettering size and arrangement to be approved by Engineer prior to manufacture.
- iii) Allow for average of twenty-five letters per nameplate.
- iv) On instruments, controlled devices and other equipment provide clearly legible engraved or stamped permanent stainless steel tag, fastened with stainless steel cable or other Engineer approved means.
- v) Identification to be English.
- vi) Disconnects and contactors: indicate equipment being controlled and voltage.
- vii) Terminal cabinets and pull boxes: indicate system and voltage.
- viii) Transformers: indicate capacity, primary and secondary voltages. .

1.13 Wiring Identification

- .1 Identify wiring with permanent indelible markings, either numbered or colored plastic tapes, on both ends of phase conductors of feeders and branch circuit wiring.
- .2 Maintain phase sequence and color coding throughout.
- .3 Color coding to C22.1-02.
- .4 All wires shall be identified by approved type wire markers. Submit proposed cable numbering for review by the Engineer before commencing the installation.
- .5 Phase termination's shall be red, black, blue and wiring changes to obtain proper rotation shall be made at end devices, i.e. motors.
- .6 Provide cable identifications as follows:
 - a) All cables shall be tagged with markers showing the complete cable numbers at locations as follows:
 - i) Cables entering starters, panels 1 marker immediately above (or below) glanding plate or cabinet bottom.
 - ii) In addition to the above 1 marker at point where cables enter starters.
 - iii) All control conductors of all cables shall be marked with the complete wire number at both ends.
 - iv) All wire shall be identified by thermoplastic PVC sleeve type wire markers.
 - v) Wire markers shall be the individual interlocking type assembled to compose the wire number or a continuous tubular sleeve type custom hot stamped with wire number.

1.14 Wiring Termination

- .1 All wires are to be terminated on approved lugs or terminal blocks suitable for copper conductors.

1.15 Delivery

- .1 The instrumentation and control panels are to be delivered to site. Together with the MCC and VFD's and put in place in the new electrical and control building by the supplier. All field wiring will be done by others. Delivery time is critical and is to be coordinated with the City of Vancouver Project Manager. Provide storage of the complete equipment, MCC, VFD's and control panel in the supplier facilities, at no additional cost, until the site is ready to receive the equipment.
- .2 Insure the equipment and pay any costs associated with claims, until the equipment is in place in the Electrical and Control Building.

1.16 Care, Operation and Start-up

- .1 Instruct the City's representatives in the operation, care and maintenance of equipment.

1.17 Installation of Equipment

- .1 Provide all labor and all necessary equipment including timbers, scaffolding, tools and rigging materials for installation of the equipment.
- .2 The contractor shall be responsible for coordinating all mechanical, electrical and other works for the equipment being installed and shall coordinate with the General Contractor who is retained by the City under separate contract.
- .3 All instrumentation and equipment shall be provided with all required mounting hardware to mount the device according to the mounting requirements indicated in the individual device specification or the device user manual.
- .4 The equipment provided under this Contract shall be installed in accordance with the manufacturer's instructions, the applicable installation standards, and any related requirements of the Contract Documents in a manner that will ensure satisfactory operation upon completion.

END OF SECTION 16010

PART 1 GENERAL (16440)

1.1 Related Work

- .1 The Motor Control Center (MCC) is to be constructed for both 3 phase 3 wire 600 VAC and 3 phase 4 wire 347/600 VAC use, provide neutral bus. Ensure proper coordination of motor overloads with equipment supplier. Motors to be 600 VAC 3 phase 3 Wire.

1.2 Shop Drawings

- .1 Submit shop drawings in accordance with Section 16010 for all components of motor control equipment.
- .2 Indicate on shop drawings:
 - a) Overall width, height and depth.
 - b) Dimensioned layout of internal and front mounted components.
 - c) Terminal strip designations.
 - d) Schematic and wiring diagrams.

PART 2 PRODUCTS

2.1 Equipment Identification

- .1 Contractor to provide Equipment identification in accordance with Section 16010.

2.2 General

- .1 It is the contractor's responsibility to ensure that the layout and dimensions of the MCC(s) are coordinated with the space available for installation and with all related equipment. MCC arrangement and dimensions are shown on the drawings.
- .2 All equipment to be standard NEMA size and rating and the MCC, ICP, and any separate enclosures are to be rated NEMA 12.
- .3 Provide overload elements selected to correspond to the manufacturer's recommendation for the full load nameplate current for the motor used.
- .4 The MCC is to be constructed of independent vertical sections fabricated from rolled flat steel sheets, bolted together to form rigid, completely enclosed assembly. The MCC is to incorporate the features listed below:
- .5 Each vertical section divided into compartment units, minimum 200mm high, or as indicated.
- .6 Horizontal wireways, equipped with cable supports, across top and bottom, extending full width of motor control center, isolated from busbars by steel barriers.
- .7 Vertical wireways for load and control conductors extending full height of vertical sections, and equipped with cable tie supports.

DETAILED EQUIPMENT SPECIFICATIONS
MOTOR CONTROL CENTRE

- .8 Installation and wiring to units accessible with doors open and units in place.
- .9 Openings, with removable coverplates, inside of vertical sections for horizontal wiring between sections.
- .10 Provision for outgoing cables to exit via top or bottom.
- .11 Removable lifting means.
- .12 Main horizontal and branch vertical, three phase high conductivity tin plated copper busbars in separate compartment, insulated, self-cooled, extending entire width and height of motor control center, supported on insulators and rated:
 - a) Main horizontal busbars: 1000A
 - b) Branch vertical busbars: 400A
- .13 Branch vertical busbars for distribution of power to units in vertical sections.
- .14 No other cables, wires, equipment in main and branch busbar compartments.
- .15 Buswork bracing: minimum 35kA RMS symmetrical short-circuit current.
- .16 Bus supports of glass filled polyester.
- .17 Power and control terminals.
- .18 Wiring and schematic diagram inside starter enclosure.
- .19 Identify each wire and terminal for external connections, within starter, with permanent number marking identical to diagram.
- .20 Motor circuit interrupter and circuit breakers with operating lever on outside of enclosure with provision for:
 - a) Lockable in "OFF" position with up to 3 padlocks
 - b) Lockable in "ON" position
 - c) Provision for preventing switching to "ON" position while enclosure door is open.
- .21 Copper ground bus extending full width of all cubicals and located at bottom.
- .22 Lugs at each end of ground bus for size #2/0 AWG Copper grounding cable.
- .23 Approved manufacturers: Allen Bradley, Cutler+Hammer, Klockner Moeller, Siemens or Schneider.

2.3 Molded Case Circuit Breakers

- .1 Molded case circuit breaker: quick-make, quick-break type, for manual operating with temperature compensation for 40 degree C ambient.
- .2 Common-trip: with single handle for multi-pole applications.

- .3 Magnetic instantaneous trip elements in circuit breakers to operate only when value of current reaches setting. Trip settings on breakers with adjustable trips to range from 6-15 times current rating.
- .4 Each breaker shall have “Engaged” and “Disengaged” positions and it shall be possible to close the breaker compartment door in any of these positions. The breaker shall be equipped with a mechanical breaker position indicator located such that the circuit breaker position is visible with the front door open.
- .5 All circuit breaker indications and operations for each breaker shall be accessories without opening enclosure door.
- .6 Provisions for padlocking in the “OFF” position.
- .7 Circuit breakers shall be as indicated on drawings.
- .8 Set the circuit breaker in accordance with the manufacturer’s recommendations.

2.4 Power Factor Capacitor Contactors

- .1 3 phase, 600VAC CONTRACTORS, fully rated for the load being served, type AN16 NEMA Size as indicated, 120V 60Hz magnet coil.
- .2 Power and control terminals.
- .3 Two sets of N.O. and N.C. aux. contacts on main contactors.
- .4 Wiring and schematic diagram inside starter enclosure.
- .5 Identify each wire and terminal for external connections, within starter, with permanent number marking identical to diagram.
- .6 Provide a green pilot light for contactor closed indication on the MCC motor section.
- .7 Provide Local-Off-Remote switch for each motor on the associated MCC motor section, c/w wiring as indicated on drawings and specifications.

2.5 Overload

- .1 Motor overload protective device shall be an integral part of each starter, SSD and VFD.

2.6 Control Transformers

- .1 VA Range: as required by load.
- .2 Class B insulation
- .3 Primary Voltage: 600V
- .4 Secondary Voltage: 120VAC
- .5 Dual Primary Fuse
- .6 Secondary hot fused, neutral - grounded
- .7 All welded construction

- .8 Install a control transformer in each FVNR starter MCC section and VFD compartment where required to complete the control system.
- .9 Approved manufacturer: Allen Bradley type 1497 or approved equal.

2.7 Soft Start Devices (SSD)

- .1 The SSDs shall be rated for 600VAC and 50HP pump. They shall be mounted as indicated on the drawings as an integral part of the MCC.
- .2 Class II Type B
- .3 Included Soft Start and Soft Stop mode.
- .4 Bypass contactor to be controlled by a SSD relay output.
- .5 Power and control terminals.
- .6 The SSDs shall have integral CTs.
- .7 Separate motor overload protective device in each phase if required by the local electrical inspection authority complete with door mounted reset and auxiliary contact to indicate tripped condition.
- .8 They must have an analog output 4-20mA to indicate average current for each phase, three 120VAC relay rated outputs to indicate run and fault condition and four 120VAC rated digital inputs.
- .9 Each SSD shall have a HIM (Human Interface Module) - Door Mount Display installed at the door of it's MCC section.
- .10 Approved manufacturers: Benshaw or Allen Bradley.

2.8 Surge Suppression (TVSS)

- .1 Surge suppressors shall be of the nonfaulting and noninterrupting design, with a response time not to exceed 5 nanoseconds. Surge protectors shall meet the requirements of IEEE-419. Surge protectors shall be as indicated on the Drawings.

2.9 Digital Power Meters (DPM)

- .1 Digital Power Meters shall be complete with all required metering transformers, connections, protection and power supply for full operation with user selectable digital display, manual and automatic scrolling, Eaton type IQ-250 or equivalent, installed as indicated on the Drawings.

PART 3 EXECUTION

3.1 Construction

- .1 Assemble as per plans and specifications.

3.2 Delivery and Installation

- .1 Deliver the unit to the Vancouver Landfill site and put it in place, ready for connection in the new electrical and controls building. Coordinate delivery with the City of Vancouver Project Manager. Refer to section 16010 for additional delivery and startup information
- .2 Check factory-made connections for mechanical security and electrical continuity.
- .3 Make all required power and control connections except connections to field devices. Provide all required interconnection to the control panel.
- .4 Ensure correct overload heater elements are installed.

3.3 Setup, Testing and Commissioning

- .1 Carry out complete testing and commissioning onsite.
- .2 Set up and program all devices in the MCC as per these specifications and operation requirements, and provide such other commissioning services as are necessary to assure that the equipment is fully and correctly installed and to place the MCC into operation.

END OF SECTION (16440)

PART 1 GENERAL (SECTION16450)

1.1 Related Work

- .1 Interconnection to associated device terminal strips and Motor Control Center (MCC) and Variable Frequency Drives (VFD).
- .2 Installation of linkage conduits and cables to remote field devices and instruments.

1.2 Shop Drawings and Product Data

- .1 Submit shop drawings and product data in accordance with Section 16010.

PART 2 PRODUCTS

2.1 Grounding

- .1 Provide lug for size #6 AWG Cu grounding cable bonded to system grounding.
- .2 Ground items of instrumentation and control equipment to ground bus with individual stranded copper connections size #14 AWG min.
- .3 Provide 2.5 x 15cm copper grounding bus mounted in each LCP at lower left side.

2.2 Equipment Identification

- .1 Provide equipment identification in accordance with Section 16010.

2.3 Instrumentation and Control Panel

- .1 Panel shall be NEMA-12, free standing but interconnected into the MCC and VFDs, sized to accommodate proper layout and mounting of equipment and devices as per drawings and specifications.
 - a) Nameplates: Lamacoid Black plate, white letters, Size 1" (Leachate Pump Station).
 - b) Provide minimum 12 gauge metal for cabinet and 11 gauge equipment mounting pans.
 - c) All seams to be continuously welded.
 - d) Door stiffeners as required.
 - e) Provide maximum height removable backpan.
 - f) Provide maximum width door.
 - g) Provide single point lockable, automotive type door handle on right side of door.
 - h) Provide full height hinge on left door side.

- i) The control panel layouts as indicated on the drawings are not to scale. They are schematic and provided for information only. They show most of the equipment that is required to be installed in the panel. However, the contractor is to do a complete take-off from all drawings and specifications, and provide all materials and determine the size of control panel required for a complete functional assembly.
 - j) Bond each panel's door to the panel grounding lug.
 - k) Finish: Apply as per section 16010.
 - l) Interior: white, a coat of primer and 2 coats of finish, 1.5 mils per coat
 - m) Exterior: ANSI Gray 61
 - n) The control panel shall be made of steel with scratch resistant baked enamel finish.
 - o) All wiring incoming and outgoing, shall terminate at terminal strips, isolation relays or analog circuits surge suppressors mounted inside control panels. Each terminal strip must be identified with a terminal strip number.
 - p) All components mounted on or within control panels shall be supplied and fully wired under this contract, unless otherwise noted.
- .2 The Instrumentation Control Panel shall contain but not be limited to the following:
- a) PLC: PLCDirect as indicated on the drawings c/w 8 slot gbase D4-09B-1.
 - b) Human Machine Interface (HMI): EZTouch Panel EZP-T8C-F c/w Ethernet card EZP-Ethernet. Ethernet card shall be installed in the panel.
 - c) Power Supplies PS-01, PS-02 - 24VDC, 10A
 - i) 120VAC/ 24VDC 10A
 - ii) Omron: S8VS-24024BP
 - iii) Mount in the control panel as per drawings, specifications and manufacturer's instructions.
 - d) Ethernet Switch 10/100 ES-01, ES-02
 - i) N-TRON model 304-TX
 - ii) Four RJ-45 ports
 - iii) Dual 24VDC power supply
 - iv) Configuration free
 - v) Mount in the control panel as per drawings, specifications and manufacturer's instructions. 24VDC input #1 to be connected to PS-01, 24VDC input #2 to be connected to PS-02.
 - vi) Supplier: Westburne 604-205-2800

- e) Ethernet Switch 10/100 ES-03,
 - i) N-TRON model 306-TX
 - ii) Six RJ-45 ports
 - iii) Dual 24VDC power supply
 - iv) Configuration free
 - v) Mount in the control panel as per drawings, specifications and manufacturer's instructions.
 - vi) Supplier: Westburne 604-205-2800

- f) Cooling Fan CF-01
 - i) 115VAC cooling fan
 - ii) Cooling thermostat
 - iii) Located on the bottom left side of the control panel. Air suction in the panel and discharge at the top left side on the control panel. Suction and discharge openings to be protected by louvers.

- g) Receptacle
 - i) 120VAC, 15A

- h) Coordinated Manual Controls (Operator Control Devices)
 - i) Coordinated Manual Controls: in accordance with drawings.

- i) PLC Interface Relays, CR-01 to 34, and hard-wired control relays.
 - i) DIN rail mount in panel and wire as per drawings. Refer to 16975.

- j) Runtime hour meters HM-01 and HM-02
 - i) Model Omron H7ET-FBV complete with Y92F-75 panel adapter.

- k) Constant Voltage Power Conditioners CVS-01 and CVS-02
 - i) Sola Model 63-23-215-C8 MCR series constant voltage power conditioners for primary and secondary control power
 - ii) Input Voltage: 120 VAC
 - iii) Output Voltage 120VAC
 - iv) Rated Power: 1500VA
 - v) Regulation: +/- 3% for an input variation of +10% to -20%
 - vi) Noise Isolation: >120dB common mode, > 60dB normal mode

- l) Isolating IS interface Unit ISO-01:
 - i) Power Supply: 120VAC
 - ii) Digital Inputs: 3
 - iii) Digital Outputs: 3 relays 120VAC, 100VA
 - iv) Model: MTL2213
- .3 A complete take-off from all drawings and specifications shall be done by the Contractor in order to determine accurate quantities of all equipment and materials for Instrumentation and Control Panel.

PART 3 EXECUTION

3.1 Construction

- .1 Assemble and test as per drawings and specifications.
- .2 Provide a list laminated in plastic of all circuit breakers and fuses mounted in the control panel.
- .3 In addition to all other work allow a minimum of 16 hours for a qualified instrument technician familiar with the project and with all aspects of the control panel to assist the Engineer during start-up of control systems.
- .4 Conduit entrance to control panel shall be from top and bottom only (no side entry).
- .5 PLC Analog Input Cards shall be setup for 4-20mA signals.

END OF SECTION (16450)

PART 1 GENERAL (SECTION 16825)

1.1 Description

- .1 Provide complete Variable Frequency Drive (VFD) equipment, as indicated on the drawings and these specifications, one complete in a free-standing complete Nema 112 enclosure, the other mounted in the MCC.
- .2 Although such work is not specifically shown or specified, all supplementary or miscellaneous items, appurtenances, and devices incidental to or necessary for complete, operational Variable Frequency Drives shall be furnished and installed as part of this work.
- .3 See Section 16010 - General Electrical Provision.

1.2 Shop Drawings

- .1 Supply descriptive product information.
- .2 Complete master wiring diagrams, elementary control schematics including interconnection and coordination with instrumentation and control panel, programmable logic controller (PLC) and other electrical control devices operating in conjunction with the VFD.

PART 2 PRODUCTS

2.1 Materials

- .1 Acceptable Manufacturers
 - a) Rockwell, Arrow Speed Controls, Yaskawa or approved equal.
- .2 Motors: Verify all motor sizes and specifications from specifications and drawings.
 - a) It is the responsibility of the Contractor to fully coordinate the variable frequency drive equipment with the motors and associated equipment to provide a totally-integrated, operational system.
- .3 Variable Frequency Drives
 - a) The variable frequency drives shall consist of a 600 volt three phase adjustable frequency inverter with integral control, sequence logic, and self diagnostics as specified hereinafter. The drives shall be of "pulse width modulated inverter" (PWM) type employing IGBT power semi-conductor technology.
 - i) The VFD shall limit harmonic distortion reflected onto the system to a voltage and current distortion level as defined by IEEE 519 for general system application. When required, harmonic attenuation shall be provided by the addition of drive line reactance or multi-pulse converter phase shifting arrangement, isolation transformers, or harmonic filters.

-
- b) The variable frequency drives shall be rated as shown on the Drawings variable torque, 600 volt, three phase, 60 HZ. The VFDs shall be a microprocessor-based static adjustable frequency controller designed to provide continuous-speed adjustment of 3-phase motors. The adjustable frequency output voltage shall provide constant volts per hertz excitation to the motor terminals up to 60 HZ. The VFDs shall provide energy-efficient, low-loss speed control in the range from 4 to 60 HZ.
- c) The VFDs shall operate in an ambient temperature of 0°C. to 40°C., an altitude of up to 300 meters above sea level, and humidity of 0 to 95 percent non-condensing. The VFDs shall be wall mounted or integrated in the MCC as indicated.
- d) The VFDs shall have complete front accessibility with easily removable assemblies to allow fast, efficient maintainability when required.
- e) The following microprocessor-based, door-mounted operator controls and status indication shall be provided:
- i) Run/stop selection with LED indication (from keypad and remote signal).
 - ii) Speed control selection with LED indication (from keypad and remote).
 - iii) Current limit indication.
 - iv) Microprocessor fault.
 - v) Reset button.
 - vi) Manual speed adjustment.
 - vii) Frequency meter.
 - viii) Ammeter.
 - ix) Output voltmeter.
 - x) Elapsed time meter.
 - xi) Cause of trip.
- f) The following basic control functions and features shall be provided on the VFDs:
- i) Interface for external hand-off-auto switch and control signals as shown on the Contract Drawings
 - ii) Interface for external 4-20 mA speed reference signal.
 - iii) Speed indication for digital display at control panel
 - iv) Run status output relay with dry contacts wired to terminals for functions required on the Drawings or Specifications.

- v) Tripped status output relay with dry contacts wired to terminals for functions required on the Drawings or Specifications.
- vi) Control power transformer and power supplies as required to derive all necessary control voltages from the 600 volt, 3-phase input.
- g) The following standard protective functions shall be provided on the VFDs:
 - i) Input A.C. circuit breaker with an interlocked, padlockable handle mechanism.
 - ii) Input fuses rated for 200,000 AIC.
 - iii) Electronic instantaneous overcurrent protection.
 - iv) DC bus undervoltage protection.
 - v) DC bus overvoltage protection.
 - vi) Overload protection.
 - vii) Overload warning.
 - viii) Controlled over temperature protection.
 - ix) Over frequency protection.
 - x) Phase loss protection except units designated as single phase input, and three phase output
 - xi) Output terminal short circuit protection.
 - xii) Status indication will be via an alphanumeric display for the following protective functions: Instantaneous overcurrent, DC bus undervoltage, DC bus overvoltage, overload, overload warning, controller over temperature, over frequency, and phase loss.
- b) The following standard independent adjustments shall be provided on the VFDs:
 - i) Minimum frequency.
 - ii) Maximum frequency.
 - iii) Four (4) preset speeds initiated by contact closures.
 - iv) Four (4) acceleration times.
 - v) Four (4) deceleration times.
 - vi) Minimum speed dwell time.
 - vii) Voltage boost.
 - viii) Volts-to-hertz ratio.
 - ix) Carrier frequency.

- x) Current limit.
 - xi) Critical frequency avoidance zones.
 - xii) Jog input.
 - xiii) Selectable auto restart.
 - xiv) Ability to catch a spinning motor.
 - xv) Selectable process signal (0-10 V, 4-20 mA).
- c) The following operational characteristics shall be exhibited by the VFDs:
- i) Frequency stability of 0.5 percent over a twenty-four (24) hour period.
 - ii) Voltage regulation of +/- 2 percent of maximum rated output voltage.
 - iii) Insensitive to input line phase rotation.
 - iv) Operational efficiency greater than ninety-five percent (95%) at full load.
 - v) Power factor ninety-five percent (95%) throughout operating range.

PART 3 EXECUTION

3.1 Installation

- .1 Install in MCC or enclosure as indicated on drawings and in accordance with manufacturer's recommendations and instructions.
- .2 Complete seismic restraint to seismic requirements for the Greater Vancouver Area (Delta).
- .3 Provide services of factory-trained technician for inspection, programming, startup, and certification of completed installation. Provide minimum eight (8) hours on site per unit.
- .4 Provide complete operation and maintenance manual per Section 16010 - General Electrical Requirements

END OF SECTION (16825)

VANCOUVER LANDFILL SAFE WORK PROCEDURE

Developed or Revised (most recent date): Sept 2008
 Next Scheduled Review / Revision: Sept 2009

SITE SAFETY ORIENTATION / AGREEMENT

The City of Vancouver, Transfer & Landfill Operations Branch requires that all persons working on the Vancouver Landfill (VLF) site receive the following orientation before any work is to begin. The orientation includes an outline of general safety issues, working alone, emergency and first aid procedures, protocols for working near heavy equipment and personal protective equipment requirements. All individuals, understand, agree to comply with, and sign this document in order to have access to or do work on this site.

Sections

1. General Safety Issues
2. Working Alone
3. In The Event of an Emergency
4. First Aid
5. Heavy Duty Equipment
6. Personal Protective Equipment
Legal Terms and Conditions
Statement of Responsibility

VANCOUVER LANDFILL SAFE WORK PROCEDURE

1. GENERAL SAFETY ISSUES
 - The speed limit on the Landfill premises is 30 km/h (20 mph).
 - Smoking anywhere on the site is prohibited.
 - Scavenging is prohibited.
 - The use of cellular phones is not permitted while operating vehicles/equipment. Always move to a safe place out of the way of any equipment or vehicles prior to using a cellular phone or engaging in any other non-mobile activity.
 - All drivers/operators must observe traffic control measures (i.e. stop signs and cones).
 - Be aware of and stay clear of coned off areas. These are to protect you from any hazards.
 - Seatbelts must be worn at all times while vehicles are in motion.
 - Be aware that asbestos is routinely managed at the Landfill. Stay upwind of any yellow bags at the Landfill face.
 - All support workers must sign in and out by completing the "Visitor Sign-in Sheet" located at the Landfill Administration office during regular hours or at the Scalehouse after hours.
2. WORKING ALONE
 - Must sign in and out at the Landfill Administration office and advise reception staff they will be working alone.
 - Have reception staff assign a personal ID number (0010, 0020 or 0030).
 - Follow attached procedures for accessing the Safetyline Mobile Worker Monitoring System.
3. IN THE EVENT OF AN EMERGENCY
 - Report any fires, spills, accidents or other emergencies to the Landfill office immediately (604.940.3213). In the event of an emergency that requires outside assistance, call 911 immediately. The Landfill Manager is responsible for contacting additional authorities as required.
 - Report any health & safety accidents and/or near-miss incidents to the Landfill Office.
 - Your first priority is to warn others and evacuate the immediate area. Do not put yourself in danger.
 - If not directly and helpfully involved, report to the Emergency Assembly Location at the east side of the Landfill Administration building.
 - Do not return to the site until instructed that it is safe.
 - Material Safety Data Sheets are located in Superintendents office.
4. FIRST AID
 - The first aid room is located at the southeast corner of the Landfill Administration building.
 - For emergencies, call 911 (dial "9" first from landlines).
 - Notify the designated First Aid Attendant at 604.603.1655 (VLF First Aid Cell Phone). If no answer, contact the Landfill office at 604.940.3213 to alert the First Aid Attendant.
5. HEAVY EQUIPMENT
 - Do not walk in the active tipping area of the Landfill.
 - Do not move into the vicinity of any vehicle until you have made eye contact with the operator/driver and ensured that he/she is aware of your presence.
 - Do not, at any time, walk behind any piece of heavy equipment. Unless absolutely necessary, remain outside of the swing radius of excavators, approximately 15 metres (50 feet).

VANCOUVER LANDFILL SAFE WORK PROCEDURE

- Always maintain a safe distance between trucks (one truck and trailer length) in the demolition dumping area. End dump style demolition trucks pose an extreme hazard of tipping over on its side when the box is lifted in the air.
 - Remember that people are more mobile than equipment - it is your responsibility to stay out of the way.
 - All equipment must be turned off before fueling.
6. PERSONAL PROTECTIVE EQUIPMENT (PPE)
- The following are necessary while on the site:
 - WCB approved Hi- visibility reflective vest or coveralls.
 - WCB approved safety protective footwear ((heavy-duty, above the ankle, construction-type safety boots with an external triangular green CSA patch). Boots should also be approved as shock-resistant when working on electrical systems (display an external white Ω CSA patch).
 - Also necessary where appropriate:
 - Respirators as per WCB requirements.
 - Hard hats as per WCB requirements.
 - Hearing protection as per WCB requirements.
 - Safety glasses and/or masks as per WCB requirements.
 - Fall protection in situations where a fall of 3 metres (10 feet) or more could occur, or from a lesser height but which represents a higher risk of injury.
 - Other specific equipment where determined necessary or by regulation for the particular situation.
 - Always observe and follow Lockout and Confined Space Entry procedures (when applicable).

**VANCOUVER LANDFILL
SAFE WORK PROCEDURE**

PROCEDURES FOR USING THE SAFETYLINE MOBILE WORKER MONITORING SYSTEM

Users log in to the SafetyLine IVR system at the start of working alone, at assigned intervals during the work, and at the end of working alone. Users, in consultation with their supervisor, should determine the interval period for checking in. The default interval is 60 minutes and may need to be shorter depending upon the risks of the particular task. Users without a personal ID/password will have one assigned by Landfill Reception staff.

To log-in to the SafetyLine IVR system, the user will:

1. phone SafetyLine at **604.299.6266**
2. enter the company ID **51#**
3. enter **personal ID** (as assigned) and #
4. enter **password** (same as ID) and #

The system will respond with a voice message “*not system monitored*”.

Support Workers will need to enter their cell phone number by:

1. press **0** (Advanced Menu)
2. press **6**, enter your cell phone number then press #
3. press **1** (to confirm the phone number)
4. press ***** to exit to the main menu

To start system monitoring, all users will need to press **2**, record a voice message stating your work location, then **#** to report ok and ***** to exit.

To check-in during the work, log in to the system as above and at the voice prompt, enter **2** and **#**. If your work location has changed, record a new voice message.

To log-out at the end of work, log in to the system as above and at the voice prompt, enter **5** and **#**; you will hear “*Thank you for using SafetyLine*”.

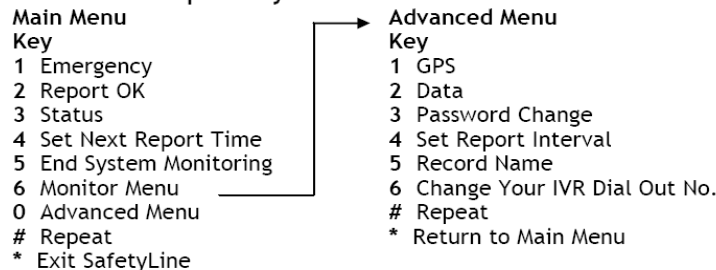

Note: these sequences can be programmed using the speed-dial or one touch button function on most cell phones.

To change the check in period from 1 hour, the user will:

1. press **0** (Advanced Menu)
2. press **4#** (Change your IVR dial out number)
3. enter the **number of minutes** for the desired interval, then **#**
4. press ***** to exit to the main menu
5. press ***** to exit the system

For more detailed instructions, please refer to the *SafetyLine Mobile Worker Monitoring System User Manual*.

Safety Line Interactive Voice Response System Menu

**VANCOUVER LANDFILL
SAFE WORK PROCEDURE**

LEGAL TERMS AND CONDITIONS

- You agree that entry to and use of the site is at your own risk and that neither the City of Vancouver, nor its employees or agents will be liable for any loss or injury to person or property whether or not caused by negligence.
- You agree to comply at all times with the above requirements and to follow the instructions of the Landfill Manager, or their designate, and/or the First Aid Attendant at all times.
- You agree to reimburse the City of Vancouver for any and all costs, losses and damage which may be caused by your failure to carry out safe working practices while on the site or to otherwise comply with this Site Safety Orientation/Agreement.
- The terms of this Site Safety Orientation/Agreement are additional to, and not in replacement of any other Landfill agreement between you and the City of Vancouver. However, in the event of any inconsistency between the two, this agreement prevails.

**RE: SAFETY AWARENESS SHEET / LANDFILL GAS
VANCOUVER LANDFILL, DELTA, BC**

This document summarizes information regarding general health and safety hazards pertaining to landfill gas and associated general safety precautions, at the Vancouver Landfill, 5400 – 72nd Street, Delta, BC.

1.0 HAZARDS

Key potential hazards associated with landfill gas are:

- **Explosions** – landfill gas (LFG) contains methane that is combustible at concentrations of 5% to 15% by volume in air.
- **Oxygen Deficiency** – landfill gas is composed predominantly of methane (approximately 40% to 65%) and carbon dioxide (approximately 30% to 50%). These gases can displace oxygen from a work space resulting in an oxygen deficient atmosphere. Typically, oxygen deficient conditions will only develop in confined spaces, deep depressions and/or as a result of uncontrolled releases of landfill gas.
- **Hydrogen Sulphide** - concentrations as high as 1,000 ppm have been identified in one well on one occasion. The latest data from May 2, 2005 indicated hydrogen sulphide concentrations below 286 ppm in all measured wells; however, hydrogen sulphide concentrations in the ambient environment have typically been identified to be below the detection limit of data logging instruments when used on the site.
- **Volatile Organic Compounds (VOC)** - other VOCs may also be present in landfill gas; however, these compounds have typically been present in trace concentrations. Some of the VOCs identified on site include: benzene, xylene, toluene and vinyl chloride.

Golder Associates

2.0 OCCURRENCE OF LANDFILL GAS

Landfill gas exists in the landfill gas collection system and in leachate and condensate collection system piping. It can seep through the landfill cover into the atmosphere or it can be forced into the atmosphere from leaks when under pressure (within the landfill gas flare station compound and in buried transmission pipes leading to the Powerhouse). The majority of the landfill gas is collected under negative pressure by the landfill gas collection system, which is comprised of wells and headers from different regions of the landfill. Each of these regions has landfill gas with its own variable characteristics. Some known areas where there may be elevated levels of landfill gas include: manifold boxes, areas adjacent to lateral collection lines, condensate traps, soil depressions and leachate ditches.

3.0 SAFETY PRECAUTIONS

The following safety precautions must be followed with respect to landfill gas:

1. Do not smoke anywhere on the landfill. Open flames are only permitted on the landfill with prior written permission from appropriate Landfill personnel.
2. Comply Workers' Compensation Board of British Columbia regulations when entering any confined space, depression, or potentially poorly ventilated areas. Adhere to the precautions and procedures identified in Table 1: Important LFG Characteristics and Facts.
3. Ensure that all gas detection equipment is in good working order and that it is bump tested daily prior to use. If bump testing identifies gas detection equipment not be working within its tolerance limits or if the equipment is outside of its calibration period, it must be removed from service immediately. Personnel must be trained in the use and limitations of the gas detection equipment used and must use it in accordance with Vancouver Landfill procedures.
4. Do not access the fenced enclosure at the flare station or conduct any work around the landfill gas control system without a personal gas monitor (able to monitor LEL, oxygen and hydrogen sulphide concentrations) and hearing protection. If the personal gas monitor alarm sounds, evacuate the area immediately and notify appropriate Landfill personnel.

Golder Associates

City of Vancouver
Lynn Belanger, P.Eng

- 3 -

May 19, 2005
04-1412-218/1000

5. If possible, stand upwind of wells or any other landfill gas works when conducting work in or around the landfill gas control system. If an accidental or uncontrolled release of landfill gas is believed to have occurred near your work area, attempt to remove yourself from the area by taking a path that is crosswind from the source and attempt to get upwind if you have determined it is safe to do so.

6. Use caution when conducting work within manifold boxes. Personal gas monitors should be used to determine gas concentrations within the manifold boxes prior to work being conducted. If the monitor alarm sounds, allow the manifold box to ventilate prior to rechecking gas concentrations. Work should not proceed until gas concentrations are below alarm levels.

7. If a hydrogen sulphide odour is detected and you do not have a hydrogen sulphide monitor in good working condition, you should remove yourself from the area of concern and notify appropriate Landfill personnel.

8. Follow all other Vancouver Landfill safety precautions, as appropriate.

Golder Associates

City of Vancouver
Lynn Belanger, P.Eng

- 4 -

May 19, 2005
04-1412-218/1000

TABLE 1: Important LFG Characteristics and Facts

Compound	Important Gas Concentrations	Comments
Methane	Less than 10% ⁽¹⁾	<ul style="list-style-type: none"> Methane gas concentrations are to be maintained at less than 10% of the lower explosive limit (LEL) at all times.
Oxygen	19.5% to 23.5% ⁽¹⁾	<ul style="list-style-type: none"> Oxygen concentrations below 19.5% represent an oxygen deficient atmosphere. The ambient atmosphere has an oxygen concentration of 20.9%. Oxygen concentrations above 23.5% indicate the presence of an oxygen rich environment and represent a fire hazard. Oxygen rich environments should not typically exist at the landfill. These conditions typically only occur when a work process introduces pure oxygen, such as welding. If oxygen concentrations are less than 19.5% or above 23.5%, all work should stop and personnel should leave the work area.
Hydrogen Sulphide	Less than 5 ppm ⁽¹⁾	<ul style="list-style-type: none"> The immediately dangerous to life and health (IDLH) concentration of hydrogen sulphide has been identified to be 100 ppm. The Workers' Compensation Board of British Columbia (WCB BC) ceiling limit for hydrogen sulphide is 10 ppm. Hydrogen sulphide concentrations should be maintained at less than 5 ppm. If hydrogen sulphide concentrations exceed this level, work procedures should be reviewed to ensure that they adequately protect site personnel. At elevated concentrations hydrogen sulphide gas will deaden your sense of smell within minutes. You can smell hydrogen sulphide at concentrations less than 1 ppm. The smell is often described as being like rotten eggs. Ambient levels have been identified to typically be below the detection limit of data logging instruments.

Note: (1) Personal gas monitors must be set to alarm when gas concentrations exceed the gas concentrations identified in Table 1. If the monitor alarm sounds, evacuate the work area immediately and notify appropriate Landfill personnel.
