

REQUEST FOR PROPOSALS NO. PS20181398

GASTOWN COMPLETE STREETS MULTI-MODAL TRANSPORTATION NETWORK ASSESSMENT

**QUESTIONS AND ANSWERS NO. 2**

ISSUED ON SEPTEMBER 19, 2018

<b>Q1</b>	Is the City aware of the travel patterns and parking utilization on weekends through existing data?
<b>A1</b>	To assist the understanding of travel patterns, the City has collected turning movement counts (weekday and weekend) at key locations in the study area. However, the City has not collected weekend parking utilization data for on-street parking.
<b>Q2</b>	<p>a. Is there overlap between <i>Appendix 2 - Questionnaire</i> and <i>Annex 1 - Appendix B</i>?</p> <p>b. Does the page limit apply only to Appendix B?</p>
<b>A2</b>	<p>a. There are some similarities, but no duplications. For example: Appendix 2 requires a Work Plan (which may be presented as a Gantt chart), and Annex 1 requires a Timeline and Schedule (which requires a narrative response). The Proponent's responses may cross-reference Appendix 2 and Annex 1, as appropriate.</p> <p>b. Yes: maximum allowable 10 pages for responses to Appendix B of Annex 1.</p>
<b>Q3</b>	The RFP requests a review of vehicular occupancy rates. Will the existing vehicle occupancy studies for the City, at least on the downtown street lines, be available for this study?
<b>A3</b>	The City has requested TransLink's 2017 Screenline data to be made available.
