

INVITATION TO TENDER “ITT” NO. PS20210810
CONSTRUCTION SERVICES FOR BERM AND DITCH REPAIR - VANCOUVER LANDFILL

QUESTIONS AND ANSWERS NO. 3

ISSUED ON July 16, 2021

Q1	Our estimating team advised that we would have no requirement for engineering services on this project. Can the requirement for the Contractor’s engineer to have E&O cover of \$2M with an aggregate limit of \$3M be waived as well, please?
A1	The ITT Schedule 9 requirement for Professional Insurance is waived.
Q2	Our insurer has reviewed the insurance requirements for the above noted project. Given the scope of work and duration of the project, is it possible to remove the course of construction and wrap-up liability policy requirements? With the current market, we can expect significant premiums otherwise.
A2	The requirements for ITT Schedule 9 All Risk Course of Construction Insurance and Wrap Up Liability Insurance remain unchanged upon review.
