GENERAL EXCAVATED MATERIALS LOADING AND HAULING
PART A - INFORMATION AND INSTRUCTIONS

1.0 THE RFP

- 1.1 This Request for Proposals (the “RFP”) provides an opportunity to submit Proposals for review by the City and, depending on the City’s evaluation of Proposals, among other factors, to potentially negotiate with the City to enter into an Agreement. **EXCEPT WHERE EXPRESSLY STATED OTHERWISE IN APPENDIX 1 TO PART C OF THE RFP: (I) NO PART OF THE RFP CONSISTS OF AN OFFER BY THE CITY TO ENTER INTO ANY CONTRACTUAL RELATIONSHIP; AND (II) NO PART OF THE RFP IS LEGALLY BINDING ON THE CITY.**
- 1.2 The RFP concerns the City’s interest in procuring the sorting, loading, hauling and reuse of Excavated Material and crushed Excavated Slab Material from Kent Construction Supplies and Services Yard at 900 East Kent Avenue South, Vancouver BC to the Vancouver Landfill at 5400 72nd Street, Delta BC or alternate Proponent site. Details of the City’s objectives and requirements to which the RFP relates are set out in Part B of the RFP. The City welcomes Proposals respecting innovative or novel approaches to the City’s objectives and requirements.
- 1.3 The City is interested in selecting a single Proponent with the capability and experience to efficiently and cost-effectively meet the objectives and requirements described in the RFP. The City currently expects to select such a Proponent and then enter into negotiations with that Proponent, which will conclude in the execution of an Agreement between the Proponent and the City. However, the City may: (i) decline to select any Proponent; (ii) decline to enter into any Agreement; (iii) select multiple Proponents for negotiation; or (iv) enter into one or more agreements respecting the subject matter of the RFP with one or more Proponents or other entities at any time. The City may also terminate the RFP at any time.
- 1.4 The City currently intends that Proposals will be evaluated by the City in relation to their overall value, which will be assessed in the City’s sole and absolute discretion. In assessing value, the City expects to consider the factors described in Section 8 below, among others.
- 1.5 **NO BID SECURITY IS REQUIRED FROM PROPONENTS IN CONNECTION WITH THE SUBMISSION OF PROPOSALS BECAUSE NO PROPOSAL WILL BE DEEMED TO BE AN IRREVOCABLE OR OTHERWISE BINDING LEGAL OFFER BY A PROPONENT TO THE CITY. THE LEGAL OBLIGATIONS OF A PROPONENT THAT WILL ARISE UPON THE SUBMISSION OF ITS PROPOSAL WILL BE LIMITED TO THE TERMS AND CONDITIONS STATED UNDER THE HEADING “LEGAL TERMS & CONDITIONS” IN APPENDIX 1 TO THE PROPOSAL FORM (PART C).**
- 1.6 The execution of an Agreement may be contingent on funding being approved, and the relevant Proposal being approved, by the Vancouver City Council.
- 1.7 Certain capitalized terms used herein but not defined where first used are defined in Section 12 below.
- 1.8 The RFP consists of four parts:
- (a) PART A - INFORMATION AND INSTRUCTIONS: This part is intended to serve as a guide to the RFP process for Proponents.
 - (b) PART B - CITY REQUIREMENTS AND ITEMS TO BE ADDRESSED IN PROPOSALS: This part describes the subject matter of the RFP, in respect of which the City invites Proposals. This part also stipulates the information that should be contained in each Proposal.
 - (c) PART C - PROPOSAL FORM: This part consists of the Proposal Form to be completed by each Proponent in connection with its Proposal. Each Proposal must be submitted under the cover of a duly completed and executed Proposal Form.

- 4.10 Unnecessarily elaborate Proposals are discouraged. Proposals should generally be limited to the items specified in Part B of the RFP.
- 4.11 The City is willing to consider any Proposal from two or more Proponents that wish to form a consortium solely for the purpose of submitting a joint Proposal in response to the RFP, provided that they disclose the names of all members of the consortium and all members complete and execute a Proposal Form (Part C). Nonetheless, the City has a strong preference for Proposals submitted by a single Proponent, including a Proponent that would act as a general contractor and use subcontractors as required.
- 4.12 Proposals that are submitted after the Closing Time or that otherwise do not comply in full with the terms hereof may or may not be considered by the City and may or may not be returned to the Proponent, in the City's sole discretion.

GENERAL EXCAVATED MATERIALS LOADING AND HAULING
ANNEX 1 - SCHEDULE OF DETAILED REQUIREMENTS

1.0 Introduction

The City of Vancouver (the “City”) is seeking a contractor to provide sorting, loading, hauling, and delivery of Excavated Materials from its transfer facility at 900 Kent Ave. S.E. (the “Transfer Facility”) to the Vancouver Landfill, as well as hauling of excess excavated material to various alternative sites in the Lower Mainland that may require fill.

Proponents are encouraged to submit for consideration alternatives to hauling to the Vancouver Landfill that provide value to the City, promote green, sustainability practices and/or make good sense. If the Proponent submits as part of its proposal an alternate use site or sites, these sites are to be supplied by the successful proponent at its sole cost, risk and expense and the successful Proponent must be able to verify with appropriate documentation that the successful Proponent has all necessary legal access, disposal and environmental permits/rights to use Excavated Material on the site(s).

2.0 Background

The City produces excavated materials/soils (“Excavated Material”) from sewer and waterworks trenches and street excavations in the order of 300,000 tonnes per year. Excavated Material is usually granular to silty and may contain rocks, boulders, tree stumps and roots, as well as asphalt and concrete pieces of various sizes and at times it may be saturated with water.

Excavated Material is hauled to the Transfer Station where it is sorted (processed) into various subcomponent stockpiles to facilitate reuse and recycling of component parts. Clean loads of Excavated Materials are transported daily to the Vancouver Landfill.

The City also produces excavated slab material (“Excavated Slab Material”) which consists of concrete and asphalt from curbs, roadways and sidewalks. The Excavated Slab Material stockpile is currently managed by a third party (the “Excavated Slab Material Contractor”) and crushed for recycling. Therefore, the management of the Excavated Slab Material stockpile and crushing of that material for recycling is not part of this RFP. Only the hauling of Excavated Slab Material is within the scope of this RFP.

The Transfer Facility is a secured and fenced area of 1 Hectare and is open for receiving and weighing inbound and outbound loads of Excavated Material and Excavated Slab Material between 7:00 am to 3:20 pm, Monday to Friday (“Regular Working Hours”). Occasionally, the Transfer Facility is open for incoming and outgoing loads outside of Regular Working Hours. The Transfer Facility is divided into areas that receive Excavated Material loads and Excavated Slab Material loads, each with a limited stockpile capacity. The Transfer Facility has an eighty (80) foot and a thirty (30) foot scale used to weigh inbound and outbound loads of all excavated materials. The City provides a scale operator to record all transactions at the Transfer Facility during Regular Working Hours.

Located inside Kent Yard and adjacent to the Transfer Facility is one (1) City owned and operated barge berth with ramp. The berth is used to unload barges of mineral aggregates. However, at times, this berth could be available for loading outbound material.

The City will consider Proposals from Proponents for part-time (subordinate to incoming City loads) use of the berth.

The City has flexibility in the site configuration and will consider Proposals suggesting alternative layouts to best accommodate all users.

REQUEST FOR PROPOSALS NO. PS20140533
GENERAL EXCAVATED MATERIALS LOADING AND HAULING
ANNEX 1 - SCHEDULE OF DETAILED REQUIREMENTS

3.0 Summary of Requirement

The City is seeking a Proponent that will provide the following services:

- (a) Load, haul and deliver approximately 235,000 tonnes per annum of clean Excavated Material;
- (b) Load, haul and deliver approximately 50,000 tonnes per annum of Excavated Slab Material recycled aggregate;
- (c) Remove and sort slab, boulders, and other materials (larger than 30cm) from the Excavated Material stockpile on a full-time basis with an excavator bucket with thumb;
- (d) An option to haul clean Excavated Material to alternative sites in the Lower Mainland that require fill. Proponent to provide list of proposed delivery site(s), the use for the Excavated Material and if the City's material would be the sole source of fill; and
- (e) An option to screen out cobbles and other soil materials greater than 2" (50mm) from Excavated Material, with cobbles/soil material to be added to the Excavated Slab Material stockpile.

4.0 Transfer Facility Capacity and Minimum Excavated Material Loads Hauled Out

- (a) The Transfer Facility has a limited capacity of approximately 3,000 tonnes for the Excavated Material stockpile. The remaining stockpile area is for Excavated Slab Material and other recyclable components of Excavated Material. The Contractor is prohibited from using this other area for additional storage of Excavated Material.
- (b) The City will be responsible for defining boundaries for the Excavated Material stockpiles relating to the capacity of the Transfer Facility. See Annex 6 Transfer Facility Site Plan 1 for the current layout of the Excavated Material and Excavated Slab Material stockpile areas. The Proponent will be responsible for hauling away excess Excavated Material outside of the boundary area as required in order to maintain a clear and safe area to receive incoming loads.
- (c) The Proponent will be responsible for removing a minimum of 1150 tonnes a day of Excavated Material and/or Excavated Slab Material from the Transfer Facility per day during Regular Work Hours. Once the 1150 tonne minimum has been reached the Proponent can either haul additional loads to an alternate disposal site or continue at the Transfer Facility.
- (d) The Proponent will be responsible for monitoring the volume of Excavated Material delivered daily to the Transfer Facility and will be allowed a twenty-four (24) hour period to schedule equipment/operators and trucks to remove excess Excavated Material.
- (e) In the event that the Proponent is unable to haul out the daily minimum tonnes and the Excavated Material stockpile is at capacity the City reserves the right to haul excess Excavated Material to the Vancouver Landfill at the Proponent's expense.

REQUEST FOR PROPOSALS NO. PS20140533
GENERAL EXCAVATED MATERIALS LOADING AND HAULING
ANNEX 1 - SCHEDULE OF DETAILED REQUIREMENTS

5.0 Vehicles and Equipment

- (a) The Proponent is responsible for transporting the daily minimum tonnes required in an energy efficient and environmentally responsible manner in order to reduce greenhouse gas emissions and other air pollutants. Current practice is to use tandem truck and trailer units, but the City is open to other equipment options using a more energy efficient solution.
- (b) The Proponent is responsible for providing equipment, machinery and experienced operator to deliver the required services, including but not limited to:
 - (i) Excavator with bucket and thumb for sorting slab, boulders and other materials (larger than 30 cm) and loading the required tonnes of General Excavated Material and Excavated Slab Material. Tier 3 engine required; higher Tiers preferred.
 - (ii) Option for equipment that can screen off 50mm (2") cobbles/soil.

6.0 Contaminated Items

- (a) The City ensures that the Excavated Material delivered to the Transfer Facility is not contaminated. Excavated Material is excavated from the City's right of ways, including streets and sidewalks by City crews. Potential or actual contaminated material that is identified during excavation will be handled separately by the City and not delivered to the Transfer Facility.
- (b) The Proponent will be responsible for delivering quality, clean loads of Excavated Material to the Vancouver Landfill. If contaminated soil is found in the Excavated Materials at the Transfer Facility, the City will pay all additional fees to have the material properly disposed of. To ensure clean, quality loads, the Proponent will be responsible for removing the following materials and placing them into the appropriate pile or bin:
 - (i) recyclable concrete and asphalt slabs;
 - (ii) boulders over 0.3 meters in size; and
 - (iii) pieces of wood, metal or pipe ; and/or
 - (iv) other materials as required.
- (c) The City reserves the right to reject any load that does not meet this requirement.

7.0 Truck/Barge Loading

- (a) The Contractor will be responsible for ensuring that its vehicles meet legal load axle limits before leaving the Site. Please note that no loads will be allowed to leave the Transfer Facility if they are greater than the GVW capacity for vehicles used. The Transfer Facility's thirty (30) foot scale can be used to weigh truck axles and load displacements to ensure that they do not exceed their legal limit for transport. The Contractor will be responsible for ensuring that all its vehicles trucks are cleaned of debris on the boxes and frames and cleaned of rocks wedged between tires.
- (b) The Contractor will be responsible for ensuring its trucks comply with the City's By-laws regulating truck use, including truck route, engine brake noise, weight and load

REQUEST FOR PROPOSALS NO. PS20140533
GENERAL EXCAVATED MATERIALS LOADING AND HAULING
ANNEX 1 - SCHEDULE OF DETAILED REQUIREMENTS

securing provisions. The scale operator will not weigh any trucks that do not comply with these truck safety issues.

- (c) The last weighing of the Contractor's trucks on the scale at the Transfer Facility destined for delivery at the Vancouver Landfill, alternate disposal site or onto barge occurs ten (10) minutes before the end of Regular Work Hours. The scale operator will reject loads past this time and have them returned to the Excavated Material stockpile.
- (d) The City reserves the right to refuse to weigh any outbound loads that arrives at the Transfer Facility within the last ten (10) minutes (between 3:20pm and 3:30pm) of the Regular Work Hours. The City will accept inbound loads within the last 10 minutes of the Regular Work Hours.
- (e) The Transfer Facility has a one-way road direction onto the scale. All inbound or outbound loads use the same roadway to enter the scale. At times, the Commercial Vehicle Unit of the Vancouver Police Department ("VPD") will use the Transfer Facility's scales to weigh trucks that they suspect are overloaded. The VPD will wait until the scale is not in use by either the Contractor or the City before weighing their suspected overloaded truck
- (f) The City reserves the right to direct truck traffic priorities under its sole discretion.

8.0 Site Cleaning and Dust Control

- (a) The Contractor will be responsible for the cleanliness of the designated work area in the Transfer Facility. The Transfer Facility has a fixed and portable sprinkler system and it has a wheel wash in the road leading out of the Transfer Facility. The Contractor will be responsible for ensuring levels of dirt and airborne dust inside the Transfer Facility is at or below acceptable levels. The Contractor's trucks leaving the Transfer Facility must drive through the wheel wash before entering City streets. Where the Contractor neglects or fails to comply with this Section 8.0, the City will, without prejudice to its other rights and remedies and at the City's election, either clean the affected area immediately (and without notice to the Contractor of its breach) or, at the City's election and on prior written or verbal notice to the Contractor, require the Contractor to clean the affected area immediately on receipt of such notice.
- (b) During the months between May and October, the Contractor will be responsible for dust control of roadways, travel areas and the scales within the Transfer Facility daily as required. See Material Transfer Facility site plan 1, Annex 6 for the layout of the Transfer Facility. Between October and May, the Proponent will be responsible for watering down the Transfer Facility as required. The City will supply a 1-1/2" diameter hose and a 1/2" diameter hose for wash down purposes. The City will supply several metal sprinkler bases and heads.

9.0 Billing

The following is the City's anticipated billing procedure for the services. Proponents should confirm their compliance with this billing procedure:

- (a) Payment for the Excavated Material and Excavated Slab Material loading and hauling will be processed on a weekly basis. The Proponent will submit a draft invoice in MS Excel no later than the following Friday setting out:
 - the purchase order number,

The Proponent if so requested shall meet with the City's Superintendent (or designate) to expedite and settle the draft invoice.

- (b) After receiving confirmation of approval of the draft invoice, the Proponent will submit a final invoice to the Central Accounts Payable Department of the City. To further clarify, each final invoice must include the name and address of the Proponent, the Proponent's invoice number and date of issue, City's purchase order #, name of contact person at the Transfer Facility, amount of the current invoice (GST to be shown separately). Attached to each invoice will be a summary sheet listing list each load, including date, ticket #, truck #, material type, net tonnes, rate, amount/price for each load.

10.0 Prohibited Uses of Landfill/Transfer Station

Purpose: All proposed suppliers are to complete and submit this form to certify compliance with the supplier performance standards set out in the Supplier Code of Conduct.

The City of Vancouver expects each supplier of goods and services to the City to comply with the supplier performance standards set out in the City's Supplier Code of Conduct (SCC) <http://vancouver.ca/policy_pdf/AF01401P1.pdf>. ANNEX 5 - VENDOR LEADERSHIP QUESTIONNAIRE

Purpose: This document is designed to identify where suppliers are going above the minimum standards in the Supplier Code of Conduct and are demonstrating sustainability leadership in their own operations as part of the evaluation criteria of a bid process.

As part of the City's corporate Purchasing Policy and related Supplier Code of Conduct, all City vendors must meet minimum requirements related to ethical, social and environmental standards. Beyond these basic requirements, the City would also like to reward vendors that are demonstrating leadership and innovation in sustainability. In order to be able to do so, the City requires that all suppliers bidding on a City contract answer the following questions. The answers to the questionnaire will be evaluated as part of the bid evaluation process.

You will need to be able to verify all your answers to the City upon request. Please keep in mind that these questions relate to your company's internal operations and overall sustainability leadership.
