| Q1 | What are the expectations around data migration and the need to migrate existing profiling and other existing data? |
|---|---|
| A1 | **Migration of Talk Van members' contact information, platform information (e.g. user name) and members' demographic profile information. Ideally, some or all current and historical community and panel data would be migrated, depending on the nature and form of the information exportable from the current platform as well as the structure and capacity of a new platform (if applicable). Proponents should provide details for migration (if applicable) and what the requirements are to implement it.** |
