

**REQUEST FOR PROPOSALS “RFP” PS20200073 -
SUPPLY AND DELIVERY OF WILDLAND FIRE APPARATUS**

QUESTIONS AND ANSWERS NO. 3

ISSUED ON: January 22, 2021

Q1	<p>Would the City consider a one-piece water tank/pump skid rather the specified split system?</p> <p>If so, would the preference be to mount the one-piece unit on a high-capacity slide-out tray or would you then prefer to remove the slide-out requirement (so long as all pump service points are reachable from the rear of the truck)?</p>
A1	<p>Yes, the main concern for this unit is to have adequate access for servicing of the pump and plumbing. As long as there is room to service and access plumbing through the compartment access panels a combined unit would be acceptable. Pending serviceable access to all components, a sliding tray would not be necessary, but the entire unit should still be removable by forklift.</p>
Q2	<p>Referring to Appendix 1 to Part B:</p> <p>Would you identify / clarify the item marked as 1.25 - “potentia” with brand name and PN or a better description?</p>
A2	<p>This line should have read as follows; “2.5” ball hitch minimum 15,000lb.”</p>
