

REQUEST FOR PROPOSALS "RFP" NO.PS20200086-
SUPPLY AND DELIVERY OF VARIOUS TRUCK BODY EQUIPMENT
QUESTIONS AND ANSWERS NO.1

ISSUED ON: July 3, 2020

Q1	Does the City have an approximate measurement regarding the Lower Tool Boxes for Item 4, 60' Aerial Lift and Chip Box Truck Body?
A1	The City is open to toolbox sizes that maximize the storage space while maintaining a 12 cubic yard chip box truck and allow storage of the aerial lift when lowered. Approximately 50" wide, 50" tall and its depth spans the width of the body. If the width needs to be shortened in the middle of the toolbox to accommodate the bucket during storage that is acceptable to the city.
