

REQUEST FOR PROPOSALS "RFP" PS20201116

PROVISION OF PARKING METER EQUIPMENT

AMENDMENT NO. 2

ISSUED ON OCTOBER 21, 2020

PS20201116 - Detailed Requirements, tab "3-Software", requirement 310 is amended as follows:

310	Integration - Machine error codes - Preferred Architecture	Proponent to integrate with the City's Maintenance Platform (Mackay Sentinel) to record issues/errors self identified by equipment in their system into (Sentinal) and ideally a mechanism to close the issue/error in the proponent's system. The City requires all maintenance work to be managed by a single system; in this scenario this functionality would be provided by Mackay as described by section 2.3 in the Statement of Work . This should operate in near real time via an API and in addition should allow for COV configuration of the type of error codes that will be integrated.
-----	--	---

RFP Part B Scope of Work, "Objectives" is amended as follows:

Objectives:

1. Replace end-of-life parking meters.
2. Improve parking payment compliance by providing a variety of payment options & use of license plate.
3. Support implementation of strategic transportation goals by enabling 2-way data connections to all parking spaces.
4. Maintain the current effective work processes supported by the current software solutions ~~as described in section 2.3~~.
5. As the concept of "smart parking" develops, physical on-street equipment will continue to be important, to provide equal access to customers without cell phones or data plans. This will require collaboration between the City and the successful proponent(s), to adjust best practices to meet evolving needs.

All other conditions and specifications remain unchanged.

This amendment must be completed, and attached to the Proposal Form.

If the Proposal has already been submitted, this amendment shall be emailed to bids@vancouver.ca prior to the Closing Time of 3PM Local Vancouver, BC Time, November 5, 2020 as "AMENDMENT NO. 2 to RFP PS20201116 PROVISION OF PARKING METER EQUIPMENT".
