1.0 SERVICES

The City expects to require the following services in relation to flusher truck services, examples of the services that may be required, but not limited to, flushing expansion joints, sidewalks, catch basins and dust suppression.

1.0 Introduction

The City is seeking flusher truck services with operator at various sites around the City for a contract term of two (2) years, with seven (7) possible 1-year extensions, for a maximum total term of nine (9) years.

2.0 Background

In order to meet the City of Vancouver Engineering Services needs, the City uses flusher truck services with operator at Kent Yard, a City of Vancouver Engineering Services operations branch, which provides aggregates, asphalt, recycled aggregates, and concrete to various City operations. Besides the use of sprinklers to minimize air-borne dust within Kent Yard and neighbouring streets, flushed water five days a week maintains operational cleanliness and safety. With Increased production within the recycled aggregate and excavated soils area of the facility, over recent years this has help evolve an improved standard of care with air and water quality management. To best minimize air-borne dust, to improve the work environment, to improve good neighbour initiatives, and to remain compliant with air permitting requirements, Kent’s reuse of treated storm water through the use of a flusher truck has proven to be a successful and an important method. The practice supports an organizational Exposure Control Plan for silica dust, protects workers and the public’s expectation of cleaner air within an urban industrial work environment, and to keep the facility and the neighbouring streets generally clean.

3.0 Work Scope/Requirements

The flusher truck services with operator is expected to be available and able to meet the Service needs of any of the City Engineering branches for various locations throughout the City. Typical work hours are 7:00 a.m. - 3:30 p.m. however, hours will vary daily depending on operation requirements. There is a possibility weekend and after hours work (after 3:30 p.m.) may be required depending on operation needs. In the event of emergencies, same day requests for service may be requested.

Preferred Equipment

Trucks should have 4000 gallon capacity; tandem axle; front side and rear fantails; tank top mounted 2 inch water cannons; independent and PTO driven pumps; cab operated pumping controls; 100 feet of 1 inch hose side mounted reel.

All equipment must meet manufactures guidelines as well as all Worksafe Guidelines and policies.
