RE: REVISED WORDING IN SPECIFICATIONS + ADDITIONAL INFORMATION ON JAPANESE BEETLE

1) SPECIFICATION UPDATE

CURRENTLY READS:

Specifications Section 3.3:

The Service Line at 3608 10th Ave W must be replaced.

REPLACE WITH:

Specifications Section 3.3:

The successful Proponent is to conduct a site survey at 3608 10th Ave W, and provide an accurate quote to replace the service line at that time.

2) ADDITIONAL INFORMATION ON JAPANESE BEETLE

All soil removed within the regulated area (RA), map attached, requires a movement certificate year-round. Above ground plant material is regulated from June 15th to Oct 15th and also requires a movement certificate during those dates. Turf falls under the soil regulations and must be deep buried at the landfill which generally, requires 36-48 hours notice to prepare.

Ideally, the soil is left on-site and placed back once the work is completed. As an option, the soil may also be moved within the RA from job site to job site. Once the work is done, tools and equipment should be swept or cleaned before being used in an area outside the regulated area.

Below is the hyperlink to the City website for Japanese Beetle (JB), and the CFIA JB fact sheet link. As a first step, contractors must ensure that they have a movement certificate and movement log of all material moved outside of the RA. See attachment for details.
